1st Half-Year	104,0	101,3	+2,6%

Growth at constant exchange rates for the 2nd Quarter 2008: + 15.3%

On the first half of the year 2008, RADIALL records a turnover of 104.0 M€, with a growth of 2.6 %. With unchanged exchange rates this represents over the period a growth of 8.5 %.

On the second quarter, the activity have been progressing significantly with a growth of 8,3 % when compared to 2007. At constant exchange rates, this represents over the period an increase of 15.3 %.

81.5 M€ turnover has been registered at International, reaching 78.3 % of the total turnover.

2008 Outlook

Due to its strong technical expertise and innovation, RADIALL benefits from a permanently renewed confidence from its major customers.

Continuing its effort to balance its Euro / Dollar currency flows for a better profitability, RADIALL reinforces its internationalization by pursuing the development of its Mexican factory.

In an uncertain environment, the Group confirms that its 2008 turnover should be close to the one published for 2007.

An impact on the first half-year 2008 operational margin is expected due to the unfavourable incidence of foreign exchange rates and the delays in the launch of some aeronautics programs.
