

Message to shareholders

For two months, RADIALL share price has been facing a significant decrease in a very fluctuating stock exchange environment.

Considering the assets which our Group has, we cannot explain such a decline of the share price and we wish to remind our trust in our ability to go through the current economic crisis:

- a diversified client portfolio across several sectors, some of which are still benefiting from sustained activity (ex. : Military and Space),
- contrary to the 2008 first half year, RADIALL benefits, as expected, of less unfavourable effects on currencies and raw materials,
- our Group can rely on a very solid balance sheet structure with a widely positive 52.5 M€ cash as of September, 30th 2008.

We would like to thank our shareholders for the trust they place in our Group in this uncertain environment and give them meeting on January 16th, 2009 for the communication of the 2008 annual turnover.
