

April 2009

**Subject: RoHS Compliance of AEP products manufactured by Radiall USA**

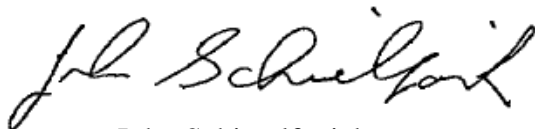

All AEP product supplied as of September **2005** is compliant to the RoHS Directive with the following exceptions:

- Product tin dipped at Radiall New Haven for PCB use;
- Cable assemblies using conformable cable;
- Cable assemblies using aluminum jacketed cable;
- Cable assemblies using T-Flex type cable.

These exceptions are non-compliant due to the use of tin lead solder and would only be used when specified on a customer SCD.

Sincerely,

John Schimelfanick  
QA Manager  
Radiall USA
