Strong rebound in the second six months of 2005

The 2005 invoicing notably benefited from the contribution of AEP's sales figures, a company acquired in May 2005. The overall increase of +9.1% incorporated organic growth of +4% and an impact of +5.1% caused by the change in the perimeter. The foreign currency impact on the annual invoicing is negligible in 2005 compared to 2004.

2006 trends:

The growth in the business activity should continue at around +10% thanks to the synergies developed with AEP, to the automotive sector and to the profits from successful implantations in the military and aeronautical segments of the market.

The increase in sales figures should also be accompanied by growth in operational profitability expressed in percentage.
