

SALES FIGURE INCREASE STRONGLY IN 2006
ACQUISITION OF THE IDFI GROUP

The consolidated business on December 31, 2006:

<u>Consolidated sales figures</u>	End of 12/06	End of 12/05	Y/Y-1
1 st quarter	€ 52.2M	€ 40.0M	+30.3%
2 nd quarter	€ 53.9M	€ 44.0M	+22.6%
3 rd quarter	€ 55.1M	€ 46.4M	+18.8%
4 th quarter	€ 49.9M	€ 47.7M	+4.6%
Total for the year	€ 211.1M	€ 178.1M	+ 18.5%

Good trend in sales in 2006

The sales figures for the year 2006 include a positive curve of €2m notably linked to the acquisition of AEP in May 2005. Overall growth is 18%. In 2006, the currency effect was negligible on annual invoices compared with 2005.

The last quarter was slightly down compared with the rest of the year because of a particularly unfavorable exchange effect and the December impact of JERRIK's sale of the filter connector business.

Trend for 2007

Business should continue doing well in 2007 especially in the military and aviation markets. Information available shows that sales figures will be affected by the impact of the exit of JERRIK (filter connectors) and LARSEN (automobile and wireless telecom antennas) at the end of 2006. However, increased operational profitability is expected in 2007.

Reinforcement of RADIALL's technological expertise

RADIALL announces that it has finalized the takeover of the IDFI Group. This company, based in Dole in the Jura, employs one hundred people specializing in high-speed machining, which is the technological and strategic key to developing multi-contact connectors with metal cases, for sale to aviation customers in particular.

Also, IDFI has a range of machined products designed for the medical and industrial markets, which are an ideal complement to what RADIALL offers.

Outside the RADIALL Group, the extra sales expected in 2007 should be around €6m.

Next rendezvous

The Company will present its consolidated income statement to the financial community next March 30.

Radiall designs, develops and manufactures electronic wireless communications components for automobile computer communications and military and aviation equipment.
