

9 month 2007: organic sales growth up 7.6%

€ millions – Sales figures	2007	2006	Var.
First quarter	52.6	52.2	+0.8%
Second quarter	48.8	53.9	-9.5%
Third quarter	50.4	55.1	-8.5%
Total	151.8	161.1	-5.8%

Over the first nine months of 2007, RADIALL recorded sales in line with expectations:

- Consolidated sales are down 5.8% because of changes in company structure (negative impact of 10.4% mainly due to businesses sold in 2006) and adverse exchange rates (negative impact of 3.1%).
- Net organic growth is up €12.3m or 7.6% compared to 2006 thanks to good performances achieved in the aviation and military market segments.

Confirmed trends

Based on its well-balanced market portfolio, RADIALL will step up its strategy of differentiation in its fields of expertise including radio frequency components, multisignal connectors and fibre optics, and over selected applications.

For 2007 RADIALL confirms its guidance for an annual sales figure slightly lower than 2006 and a higher profitability.

For the years to come, the Group is very confident in achieving a steady growth thanks to the major multi annual sales agreements recently signed with military and aircraft equipment manufacturers.

Next press release:

2007 annual sales: January 10th, 2008
