

**FOR IMMEDIATE RELEASE**

## **4.3-10 Termination & Attenuator Series: A high performance microwave solution**

July 2016 - Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has released a new 4.3-10 Termination & Attenuator series. This new innovative series features microwave components equipped with 4.3-10 connectors with terminations up to 100W and attenuators up to 15W, for applications such as telecom base station integration and microwave power testing.

This global range includes terminations from low power (2W) up to high power (100W) at 6 GHz maximum frequency. These terminations are compliant with several environmental testing requirements (vibration, shock...) and are IP67 rated. Attenuators are available up to 15W with 6 GHz maximum frequency and are IP65 rated. These unique attenuators feature a robust design which makes them perfectly suited for severe environmental conditions.

This new 4.3-10 terminations & attenuators series is part of Radiall's global 4.3-10 range which includes a variety of coaxial connectors and all types of microwave components.

For further information on Radiall's new 4.3-10 Terminations and Attenuators please contact a Radiall sales representative, Distributor or visit [www.radiall.com](http://www.radiall.com)

###

### **About Radiall**

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
