

FOR IMMEDIATE RELEASE

Low Intermodulation Solution for Telecom Equipment

June 2015 - Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has released the 4.3-10 series, a new lightweight solution suitable for outdoor environments where reliability is required.

Designed to support telecom manufactures for outdoor low intermodulation applications, this new solution expands the existing product portfolio which includes the 4.1-9.5, 7/16 and innovative QLI (Quick Lock Intermodulation) connectors.

The new 4.3-10 connector series is 30% smaller and 60% lighter than the comparable 7/16 square flange jack receptacle. The interface design features a high intermodulation level at -166 dBc and is available in a variety of configurations, including:

- Jack: square flange, press mount receptacles and bulkhead
- Plug: straight & right angle
- Solder, crimp & clamp models
- Screw-on & push-pull coupling mechanism

4.3-10 is the perfect solution when high performance is essential and low intermodulation is required. The compact design is designed in accordance to International standards and is manufactured to meet environmental safety requirements.

For further information on Radiall's new 4.3-10 please contact a Radiall sales representative, Distributor or visit www.radiall.com
