

**FOR IMMEDIATE RELEASE**

## **50 GHz Coaxial Switch Solution**

December 2016 - Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has designed a new 50 GHz switch solution. These high performance switches use a new patented system based on Radiall's proven RAMSES concept (Radiall Modular System for Electromechanical Switches).

Radiall's range of SPDT and DP3T coaxial switches fitted with 2.4 mm connectors were developed to meet market demands where applications up to 50 GHz are required. The range now includes DPDT and SP6T coaxial switches. For high performance and reliability, in applications where users require frequency over 40 GHz, Radiall now has a variety of solutions to meet customers' needs.

Features & Benefits:

- Excellent electrical performance
- Life span: 2 million cycles
- New patented system based on our RAMSES concept
- Same electrical length and IL for all RF paths
- No equivalent product on the market for SP6T model

For further information on Radiall's expanded range of 50 GHz coaxial switches, please contact a Radiall sales representative, Distributor or visit [www.radiall.com](http://www.radiall.com)

###

### **About Radiall**

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
