

**FOR IMMEDIATE RELEASE**

## **Nex10 Terminations & Attenuators**

June 2018 – Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has developed a new series of microwave components, including terminations up to 2 W and attenuators up to 15 W equipped with Nex10™ connectors, for outdoor applications, such as, telecom base station integration.

Following the success of the Nex10™ series, Radiall developed a global range of microwave components equipped with Nex10, including terminations up to 2 W and attenuators up to 15 W. Nex10™ terminations are available at low power (2 W) from 4 to 6 GHz maximum frequency in order to meet a range of requirements and provide outstanding electrical performance. The design is suitable for outdoor applications, has passed several environmental test requirements (vibrations, shocks...), and are IP67 rated.

Attenuators are available up to 15 W with 6 GHz maximum frequency. The robust design allows attenuators to be used in severe environmental conditions, and they are IP67 rated.

Nex10™ terminations & attenuators are part of the global Radiall Nex10™ offer that includes coaxial connectors and the complete range of dedicated microwave components.

For further information on Radiall's new Nex10 Terminations & Attenuators please contact a Radiall sales representative, Distributor or visit [www.radiall.com](http://www.radiall.com)

###

### **About Radiall**

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
