

FOR IMMEDIATE RELEASE

Radiall receives an Airbus Electrics “Supplier of the Year Award”

January 21, 2015 - During a ceremony held in Toulouse on January 14, Radiall was presented an Airbus Electrics "Supplier of the Year Award" for overall performance in the year 2014.

In working side by side with Airbus since its beginning, Radiall has developed strong relationship with the leading French aircraft manufacture in civil aeronautics. The "Supplier of the Year Award" comes as a result of the effort made by all Radiall teams in recognition for innovation, competitiveness and manufacturing maturity while maintaining customer satisfaction.

Radiall has been distinguished by Airbus as a best supplier for electrical components. Radiall has previously received a "Supplier of the Year Award" in both 2008 and 2010, and an "Engineering Award" in 2012 and 2013, commending Radiall's technical know-how for two consecutive years.

"We are honored and very proud to receive this prestigious award from Airbus. This award is a reflection of our ambition to be the best and, above all, to work for the best. What matters the most to the employees of Radiall is the satisfaction of our customers. We strive to develop our performance culture every day. We endeavor to provide solutions at the forefront of innovation and to meet the expectations of our customers in the shortest period of time. It is this total commitment that is being rewarded once again today", says Dominique Buttin, Chief Operating Officer.

This award confirms the strategic positioning of Radiall in the aeronautic market. Present on every new aircraft program, Radiall has established itself as a key partner of the largest global players in this market and hopes to maintain and strengthen this position in the future.

###

About Radiall

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of interconnect components for high reliability electronic applications. Radiall has sales offices and subsidiaries throughout the world. With HQ located in France, the company realizes more than 85% of its revenue out of France.
