

**FOR IMMEDIATE RELEASE**

## **Radiall's New BNC 75 ohm HDTV Coaxial Connector Series Perform up to 6 GHz**

January 2010 - Radiall USA, Inc., introduces its new "True" BNC 75 ohm HDTV Coaxial Connector Series that can handle data rates up to 3 Gbps or higher while supporting the broadcast industry's SMPTE 292M and 424M standards. These connectors feature gold plated center and outer contacts, which provide outstanding electrical performance with a frequency range of up to 6 GHz, optimized at 3 GHz. In addition, they are intermateable with standard 50 and 75 ohm BNC products, offer better mechanical performance and durability with 1000 mating cycles guaranteed. Connectors are also easily field installable on most coaxial cables using hand-crimping tools and have colored cable boots available for easy coding of video signals.

Radiall's BNC 75 ohm HDTV Coaxial Connector Series, high frequency F connectors, high density DIN 1.0/2.3 connectors, fiber optic systems and other interconnect solutions have been developed for use in broadcast studios and broadcast transmission systems such as cameras, video recorders, routers, switching, monitoring and signal measurement and control systems.

For more information, please contact your Radiall sales representative, distributor or visit [www.radiall.com](http://www.radiall.com).

###

### **About Radiall**

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
