

FOR IMMEDIATE RELEASE

50 GHz 2.4mm Attenuators

March 2018 – Radiall is a global leader in design, development and manufacturing of innovative interconnect solutions with extensive experience in RF instrumentation for radio frequency equipment. By combining product experience with market demands, Radiall has developed a range of attenuators equipped with 2.4mm connectors that can reach 53 GHz. This new range is perfectly suited for equipment requiring high RF performance in a small form factor.

The high radio frequency performance of this offer makes it superior to the competition in all aspects. With exceptional VSWR performance (VSWR 1.65 @ 50 GHz) and the attenuation precision only reaching 0.7 dB at 50 GHz, this solution is ideal when performance is essential. The nominal power of this attenuator is 1W, which is higher than existing market solutions (generally 0.5W). The complete range of attenuators is .86 inch long making it the smallest available form factor available for this range of frequency.

For further information on Radiall's new 50 GHz attenuators, please contact a Radiall sales representative, Distributor or visit www.radiall.com

###

About Radiall

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
