

FOR IMMEDIATE RELEASE

BNC HT / MHV: High Voltage Solution

February 2017 - Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has expanded the existing High Voltage range to include, BNC HT / MHV. To support the need for high voltage coaxial connectors in the Industrial market, Radiall's comprehensive range offers a variety of product solutions with performance up to 20 KV.

This new high voltage series offers a screw-on and bayonet coupling mechanism and is fully compliant to applicable international standards. BNC HT / MHV is also fully compliant to MHV standards and compatible with existing BNC HT and offers similar performance benefits of BNC HT in order to serve MHV.

Radiall's High Voltage Range:

- HN (High Voltage N Connector - R176 series) 2 GHz / Up to 5 KV
 - Screw-On coupling system compliant with MIL-C-3643A
- BNC HT / MHV (BNC High Voltage / Miniature High Voltage connector, R316 series) 2 GHz / Up to 10 KV
 - Bayonet coupling system with reinforced dielectric according to MIL-STD-348
- SHV (Safe High Voltage connector - R317 series) 2GHz / Up to 12 KV.
 - Bayonet coupling system compliant to NIM (Nuclear Instrumentation Module) specification ND-545 A
- THT 20 (Very High voltage connector - R331 series) 1GHz / up to 20 KV
 - Screw-On coupling system with female center 4mm contact which allows testing with standard banana plugs

For further information on Radiall's expanded range of High Voltage Connectors, please contact a Radiall sales representative, Distributor or visit www.radiall.com

###

About Radiall

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the

world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
