## CLEANING & INSPECTION KIT FOR C-MTITAN™ (VIDEO DISPLAY NOT INCLUDED):

Radiall's high quality Fiber Optic cleaning kits contain the best tools and supplies to effectively remove the toughest contaminants in any fiber network.

This CLEANING & INSPECTION KIT provides a complete and thorough answer to the current need of the fiber optic market. Processes have been tested and approved by field technicians and production chain.

All cleaning materials are lint-free and enable an optimal wet and dry cleaning process.

## FEATURES:

The kit is the optimal solution for precision inspection & cleaning of C-MTitan™ termini end-face to accompany Radiall procedure **503 08 830**:

- Contains everything needed to eliminate the #1 cause of fiber link failure: contamination
- Detailed cleaning instructions for terminus inside its cartridge
- Digital analysis probe 200x / 400x equipped with USB port for easy PC or laptop connection

## NOTES:

All of the referenced products can also be ordered separately.

Available replacement consumables for easy kit replenishment in the CLEANING SUPPLIES KIT: **F780 735 102**.

The kit enables cleaning of approximately 100 C-MTitan™ contacts.
