INTRODUCTION

"QUICK-LOCK FORMULA™" - A COST SAVING SOLUTION

Radiall's patented QMA and QN connectors are now the standard for the RF telecommunication industry. The "QLF" registered trademark, Quick-Lock Formula™ standard, applies to the QMA and QN series and guarantees the full intermateability between suppliers using this trademark. Using QLF™ certified connectors also guarantees the highest RF transmission performance.

QMA (Quick-Lock SMA) and QN connectors (Quick-Lock N) enable fast, secured, and easy matings with minimum space requirements. The QMA and QN series are the perfect alternative to SMA and N connectors in new generation telecommunication systems as well as in many other RF applications.

SAVES INSTALLATION TIME

QMA and QN connectors are ten times faster to connect compared to N or SMA connectors, reducing the cost of ownership. With their snap-on interface, it takes only two seconds to connect QN and SMA connectors in field conditions.

SECURE CONNECTION

The snap-on connection is insured by a chamfer. In addition, a positive locking system ensures an excellent and secure connection. The disengagement force is lower than the panel tear-off force, preventing any panel damage. QN and QMA connectors have been successfully tested against vibration.

OFFERS FLEXIBILITY

The cabled plug can freely rotate around the jack, which allows for more flexibility during the mounting process and eases the installation within the equipment.

In addition, it prevents from any added stress on the cable and return loss reduction due to cable bending. As no torque wrench is required, the risk in damaging or scratching the panel is eliminated.

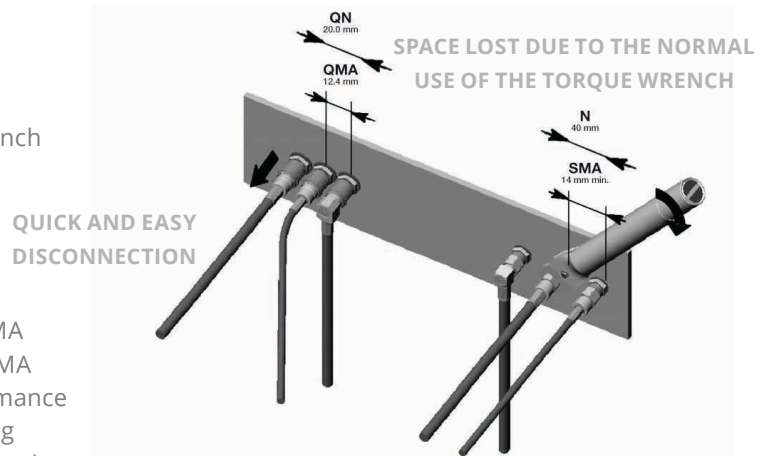

INTRODUCTION

SPACE SAVING

QN and QMA connectors have a lower space requirement since space for the use of a torque wrench is not necessary. Therefore the distance between connectors is optimized on the panel.

QMA SERIES

The QMA series with Quick-Lock Formula™, is the innovative patented snap-on generation of brass SMA connectors. With the same interface dimensions, QMA connectors have the identical high electrical performance as the SMA series with an easier and faster mounting design. The QMA series is a cost effective solution for the new generation of base stations. The QMA series is designed for DC to 18 GHz. This series features 100 matings and total reliability as the standard commercial SMA connectors. They are fast and easy to connect and disconnect. The new QMA series offers a large range of connectors: straight and right angle plugs, bulkhead jacks, flange receptacles, PCB receptacles, adapters and more. Models are either full crimp, crimp or solder type for flexible, semi-rigid or conformable cables.

WATERPROOF QMA SERIES

Radiall expands its QMA product line with new high density RF coaxial Waterproof QMA (WQMA) connector solutions with fast and easy snap-on Quick Lock technology. WQMA connectors offer outstanding electrical performance and have environmental characteristics that provide for long lasting durability needed for the most demanding harsh outdoor applications, thus eliminating the need for costly and bulky watertight enclosures or cable entries.

Waterproof QMA CONNECTORS are fully intermateable and backward compatible with any QLF™ certified standard QMA connectors and they provide for excellent ingress protection.

- IP 68 rating when mated
- 100 matings minimum for durability
- Wide temperature range -40°C / +105°C
- Power rating 200W @ 1 GHz, 75°C

QN SERIES

Offering the same operating frequency range between DC and 11 GHz as the N series, the new QN series performance has been optimized from DC to 6 GHz for 50Ω applications. The new QN interface typically features a VSWR of 1.05 from DC to 3 GHz and 1.12 from 3 to 6 GHz. The corresponding return loss is 32 dB from DC to 3 GHz and 25 dB from 3 to 6 GHz. The high screening effectiveness enables a level of RF leakage as low as -90 dB from DC to 3 GHz and -80 dB from 3 to 6 GHz.

Designed for indoor and outdoor applications such as BTS, antenna systems or test and measurement devices, QN connectors offer an outstanding intermodulation level (-155 dBC / -112 dBm) and IP rating (water and dust protection). The power rating is 300 W at 2.5 GHz and features 100 matings.

QMA

CHARACTERISTICS

TEST / CHARACTERISTICS	VALUES / REMARKS
------------------------	------------------

ELECTRICAL CHARACTERISTICS

Impedance	50Ω
Frequency Range	DC - 6 GHz (Optimized) DC - 18 GHz (Working Range)
Typical V.S.W.R. • DC - 3 GHz • 3 GHz - 6 GHz	1.06 1.12
Max Insertion Loss	0.25 dB
Insulation Resistance	5000 MΩ
Voltage Rating	≤ 500 V RMS 50 Hz, Sea Level
Dielectric Withstanding Voltage	1500 V RMS 50 Hz, Sea Level
Contact Resistance • Center Contact • Outer Contact	< 3 mΩ < 2.5 mΩ
Admissible Power @ 2.5 GHz (Continuous Power)	125 W @ T = 40°C (150 W @ T = 23°C)
Passive Intermodulation	-120 dBc @ 1.8 GHz (2x20W) (static)
RF Leakage • DC - 3 GHz • 3 - 6 GHz	-80 dB min -70 dB min

MECHANICAL CHARACTERISTICS

Mechanical Endurance	100 Matings
Engagement and Disengagement Force • Engagement • Disengagement	25 N 20 N
Retention Force for Interface	> 60 N
Cable Retention Force • 2.6 / 50 S • 2.6 / 50 D • 5 / 50 S • 5 / 50 D • 5.7 / 50 D	90 N 110 N 180 N 200 N 220 N
Distance Between Connectors: c. to c.	12.4 mm min.
Vibration	40 m.s ⁻² at 500 Hz

QRE™

INTRODUCTION

QRE™ is a Quick Lock Ruggedized connector. QRE™ was developed to provide the same advantages as QMA over SMA and designed more for aerospace and defense applications.

QRE™ is made of high grade stainless steel 316L, with Teflon coated fluoro-silicone sealing o-rings which make the QRE™ interface waterproof and ultra resistant to chemical aggression and corrosion. The outer slotted spring contact inspired from the QMA design was reinforced to provide reliable electrical contact during vibration and shock conditions. All QRE™ material were chosen and optimized to operate within the extended temperature range typical in Mil-Aerospace applications. Its superior latching mechanism provides the advantage of a snap-on connector while ensuring a very robust and secure connection. The retention force of the interface is 3 times higher than the QMA. With similar dimensions, QRE™ offers high density integration capabilities like QMA. In addition, a specific tool has been designed to easily disconnect QRE™ plugs on high density applications such as active array radar modules or panels.

A limited range of straight and right angle connectors and receptacles is available for semi-rigid and SHF high frequency flexible cable. New connectors can be quickly developed to fit your own ruggedized coaxial cable. QRE™ cable assemblies can be delivered using our SHF airframe, lightweight or outdoor cables, with or without antiabrasion jacket. Adapters are available for test and measurement in QRE™ to SMA and QRE™ to SMA 3.5 configurations.

CHARACTERISTICS

TEST / CHARACTERISTICS	VALUES / REMARKS
------------------------	------------------

ELECTRICAL CHARACTERISTICS

Impedance	50Ω
Frequency Range	DC - 12.4 GHz
V.S.W.R. Typical	
• DC - 3 GHz	1.06
• 3 GHz - 6 GHz	1.11
• 6 GHz - 12.4 GHz	1.17
Max Insertion Loss	0.25
Insulation Resistance	5000 MΩ min
Voltage Rating	335 Veff max
Dielectric Withstanding Voltage	1000 Veff min
Admissible Power (CW)	450 W @ 1 GHz - 100 W @ 18 GHz
RF Leakage	-95 dB min @ 3 GHz -80 dB min @ 12.4 GHz

MECHANICAL CHARACTERISTICS

Durability	100 matings (500 matings option is available)
Engagement and Disengagement Forces	65 N typ
Retention Force for Interface	150 N min
Minimum Connector Pitch	12.4 mm (distance between center conductors)
Vibration	MIL STD 202 Method 204 Condition D
Shock	MIL STD 202 Method 213 Condition I

ENVIRONMENTAL CHARACTERISTICS

Temperature Range	-55 °C/+165 °C
IP rating (When Mated)	IP68
Hermeticity (When Mated)	10 ⁻⁶ atm.cm ³ /s (CEI 68-2-17 Method Qk)

MATERIALS AND PLATING

	Material	Plating
Connector bodies	Stainless Steel 316L	Passivated
Center Contacts	Beryllium Copper	Gold over Nickel
Outer Contact	Beryllium Copper	NPGR
Insulators	PTFE	-
O-rings	Fluorosilicone	-
