Introduction

INTRODUCTION

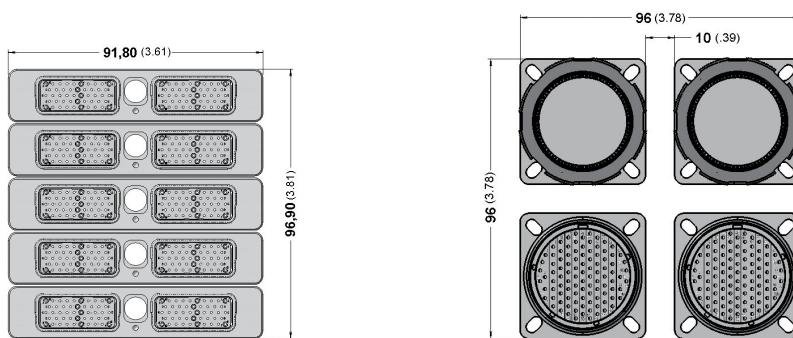

Radiall is recognized in the aerospace and defense industries for offering one of the broadest innovative product portfolios for connector interconnect solutions. The benefit of our experience with ARINC connectors permits Radiall to provide customers with a strong and global solution.

The EPX® series offers a wide range of solutions based on two insert sizes with a large variety of shells and contacts. This product range provides an excellent trade-off between the number of available contacts and the space used. The EPX® series is completely modular and expandable.

EPX® connectors are standardized by the EN4644 European standard.

A **high-density solution** compared to circular connectors:

- Slim shell design with high contact density
- Stackable shells do not require additional space for locking and unlocking the connectors

EPXB

5 shells #2 with 2*48 Cts

- **Total Cts:** 480
- **Total surface:** $96.90 * 91.80 = 8895.42 \text{ mm}^2$
- Gives $18.53 \text{ mm}^2/\text{contact}$

38999

4 shells #23 with 100 Cts

- **Total Cts:** 400
- **Total surface:** $96.00 * 96.00 = 9216 \text{ mm}^2$
- Gives $23.04 \text{ mm}^2/\text{contact}$

A **cost saving** and **user-friendly** solution:

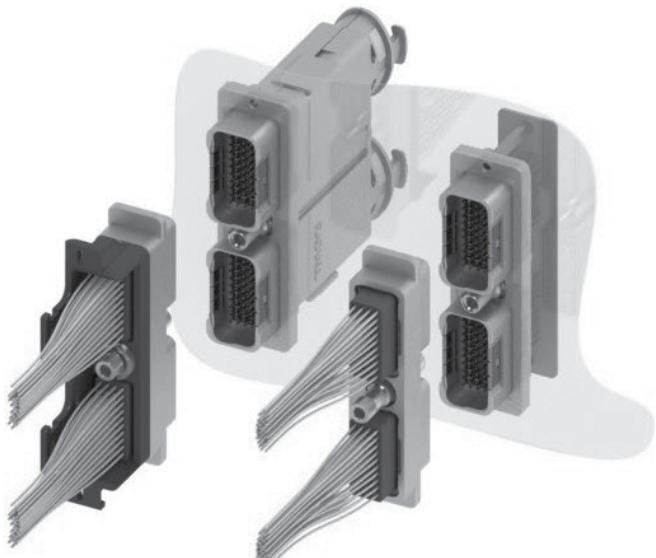

- Inserts can be wired in the workshop and later installed in the shells
- A common panel cut-out simplifies the connector installation
- Inserts can be easily installed and removed from the shell
- Inserts and shells are keyed to prevent mis-mating
- Standard Mil spec tools for contact crimping and contact insertion/extraction
- Field replaceable sub-assemblies
- Vibration resistant self-locking threads

A **modular concept** with a large variety of options:

- Shell can accommodate a wide variety of inserts for signal, power, coax, data bus, fiber optic and high-frequency BMA contacts
- Optional ground blocks (to meet the FAA HIRF requirements)
- Pin and socket inserts can be installed in either plug or receptacle shells (pin contacts are always fitted in the pin insert)

EPX® is a **versatile solution** available in two different versions:

- Aluminium
- Composite

Introduction

CABLE-CABLE

PCB-CABLE

DISCONNECT APPLICATIONS

Specially designed for panel integration on EWIS applications, EPX® disconnect connectors cover cable-to-cable and PCB-to-cable links in major commercial and business jet aircrafts.

The connector can be easily identified by the locking device located directly on the connector (quarter turn device for A1 and B1 and central screws for EPXB2). This disconnect solution offers secure mating while answering OEM's most stringent requirements, and provides:

- Modularity with three shell sizes: EPXA1, EPXB1 and EPXB2 - available as lightweight shells and compatible with several options such as ground block functionality. EPX® connectors also feature a large variety of inserts and a unique range of contacts covering any technology. EPX® connectors answer all connecting needs with the use of a limited number of components.
- Space savings with the combination of a slim shell design and high density inserts. In addition, EPX® disconnect stackable shells do not require additional space to lock and unlock the connectors.
- Time savings and cost effectiveness with modular parts that enable pre-wiring. Connectors are easy to assemble as the receptacle can be pre-installed. Inserts will be wired in the shop and plugged later, which saves integration time.

Introduction**EPXB2 FOR LRU****EPX RACK & PANEL FOR LRM****RACK & PANEL APPLICATIONS**

In response to the need of system miniaturization and new equipment design, Radiall offers EPX® connector solutions for Line Replaceable Unit (LRU) and Line Replaceable Module (LRM). Discover more about these blind mate connectors:

EPXB2 FOR LRU

Largely used in distributed architecture, small Line Replaceable Units in an aircraft need compact, lightweight and cost-effective connectors.

EPXB2 connectors equipped with centering guide will combine high density, low efforts and lightweight features. Discover the whole range of EPXB inserts offering from signal to power or quadrax contacts (available in straight or right angle PC tails and crimp contacts).

EPX RACK & PANEL FOR LRM

Today, equipment manufacturers look for more cost-effective and easy to maintain solutions such as Line Replaceable Module (LRM). As a result, Radiall has developed a new generation of Rack & Panel connectors. EPX® Rack & Panel connectors feature a modular, lightweight and high density shell that can be used on standalone PCB architecture.

EPX® Rack & Panel connectors are the perfect solution when equipment needs to combine compactness, weight savings and very high density. They offer:

- A modular range: From size 1 to size 4 using the complete range of EPX® inserts.
- Low mating force contacts from EPX® range that can reach very high density.
- A comprehensive range of contacts: Right angle or straight PC tails for signal, coax, quadrax, or power contacts.

Contacts**SIGNAL & POWER CRIMP CONTACTS**

EPX® series offers a wide range of contacts compliant with EN3155 and SAE AS 39029. The available contacts cover aerospace applications for terminating to both cables and printed circuit boards.

- Signal and power contacts
- High frequency with coax, twinax and triax contacts
- Ethernet links with Quadrax contacts
- Optical links with LuxCis® contacts

Notes

1. Electrical contacts for optical inserts are always pin contacts (hermaphrodite).
2. In order to make these contacts environmental, it is necessary to add a sealing boot. Please contact us for additional information.
3. These power contacts can be used in power inserts only (25P1).
4. These power contacts can be used in power inserts only (P3, 13P1 and 20P1).

*Contacts***SIGNAL PC TAIL CONTACTS***Selection table for straight PC tail contacts*

Contact termination designations are a combination of 2 letters:

- The first letter characterizes the contact plating

R = Pure-tin (RoHS); Z = Tin lead; Y = Gold

- The second letter characterizes the length of the PC tail: A to D

The exact lengths can be found on the assembly kit sections

Contact termination designations are a combination of 2 letters:

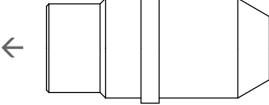

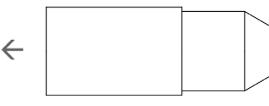

- The first letter characterizes the contact plating
R = Pure-tin (RoHS); Z = Tin lead; Y = Gold
- The second letter characterizes the length: A to D. The exact dimensions of the lengths can be found on the assembly kit sections

Disconnect Application**HOW TO ORDER EPXA & EPXB1 ASSEMBLY KIT**

Assembly kit is delivered fully assembled including shell with insert mounted, with or without contacts, according to the selection.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXA and EPXB1 plug or receptacles.
- Crimp contacts can be delivered with a kit; check which contacts would be included on page 1-12.
- If PC tail are selected, then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.
- If PC tail contacts are needed, remember that they are available as pin straight PC tail contacts in receptacles only.

*Disconnect Application***EPXB2 CONNECTORS**

Radiall's EPXB2 disconnect connectors have been widely used in the aerospace industry for more than 10 years. Meant to be used in cable-to-cable and PCB-to-cable applications, EPXB2 connectors exceed civil aerospace market expectations in terms of high density, quick installation, and cost and weight savings.

Standardized by EN4644 European standard, Radiall's EPX® has been recognized as the leading rectangular modular connector and used in major commercial and business jet aircrafts. EPXB2 connectors are designed to cover any applications including:

**EWIS**

EPXB2 provides easy maintenance and high reliability, which are key characteristics of EWIS environments.

**CABIN INTERIOR**

EPXB2 combines high speed data with space savings to serve the latest generations of cabin systems.

**COCKPIT**

EPXB2 offers simplified and intuitive installation for Fiber Optic and signal connections that are critical in cockpit design.

**AVIONICS**

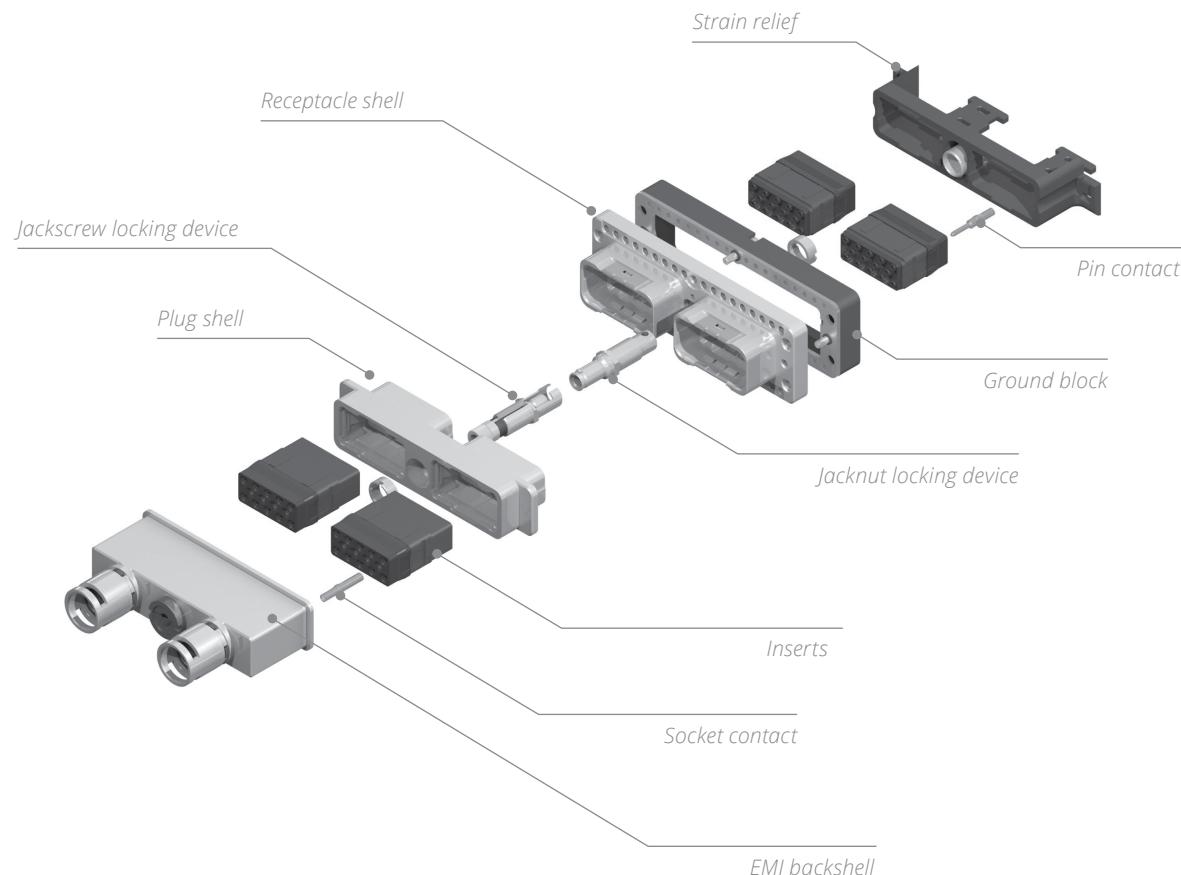

EPXB2's compactness, weight and robust design efficiently support avionics systems needs.

**POWER DISTRIBUTION**

EPXB2's stackable and segregated features make it the perfect solution for power distribution.

*Disconnect Application***EPXB2 LATEST INNOVATIONS****iEPX**

Radiall expands the EPX® series by offering iEPX, a new weight optimized EPXB2 shell designed to be used in disconnect panel applications. With an integrated strain relief and EMI backshell to press-in, iEPX provides EMI shielding while reducing cost and weight.

**FEATURES & BENEFITS:**

- Quick and easy to terminate
- Lightweight
- Prevents FOD
- Cable-to-cable connection
- Integrated strain relief

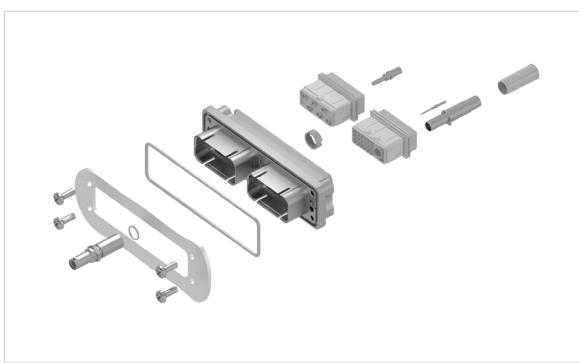

MIX & MATCH:

- Fully intermateable with all EPXB2 plugs and receptacles.
- Modular and comprehensive range: iEPX uses all contacts and inserts from EPX® range.

EPX® BULKHEAD

Radiall's EPXB2 Bulkhead receptacle is a perfect solution for disconnect panel sealing applications. Combining EPX® proven technology with Bulkhead functionality, EPXB2 Bulkhead modular connectors provide effective panel sealing with a user friendly and cost saving approach.

With EPXB Bulkhead pin insert range, Bulkhead receptacle provides permanent sealing between two zones with different environmental conditions.

**FEATURES & BENEFITS:**

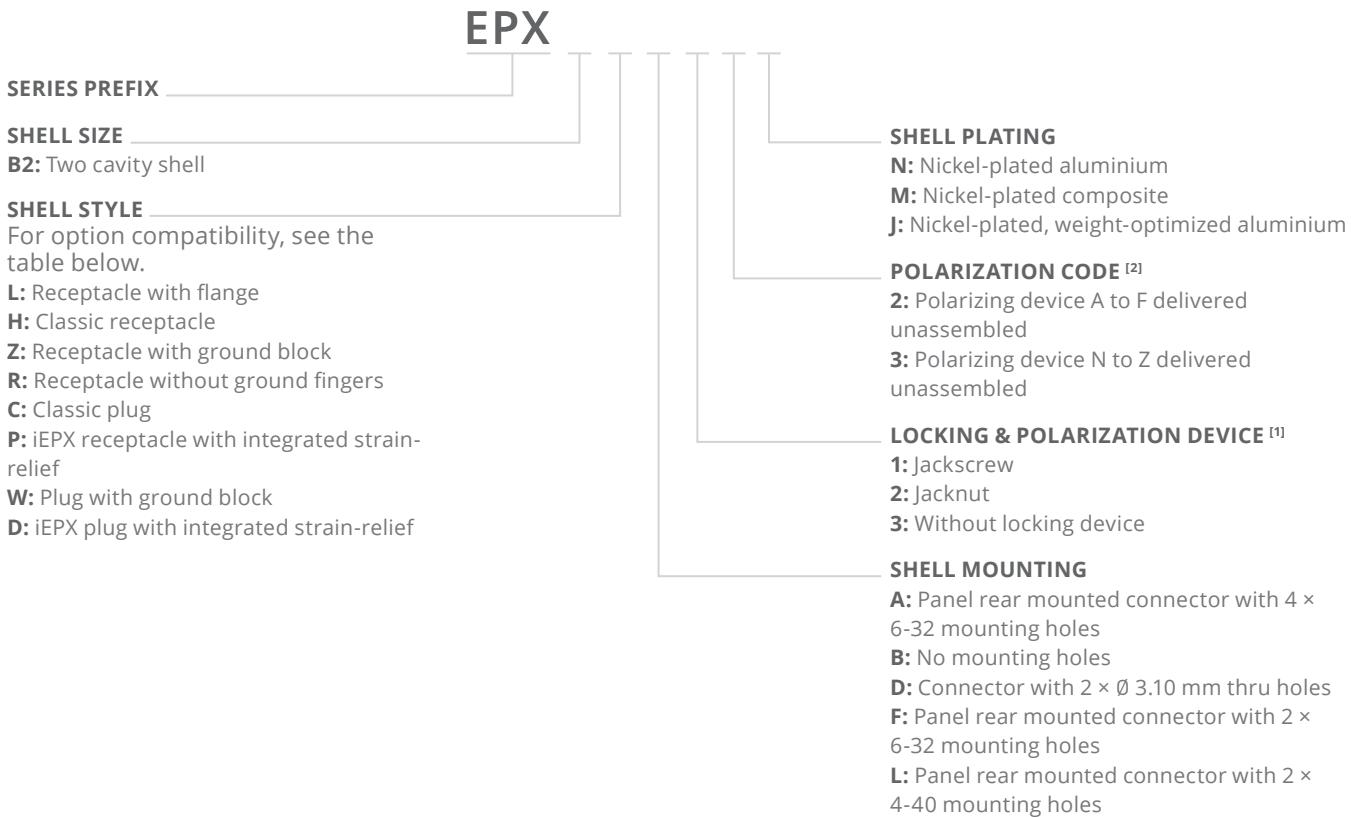

- Modular
- Competitive offer
- Optimized and mature design
- Easy and economical integration in the BOM
- PCB-to-cable or cable-to-cable connection

MIX & MATCH:

- Fully intermateable with all EPXB2 plugs
- Uses EPX® broad range of accessories and contacts including signal, power, quadrapax and fiber optics

 - Jackscrew for plug shells
 - Jacknut for receptacle shells
2. Please see page 1-40 for how to use the polarization coding.

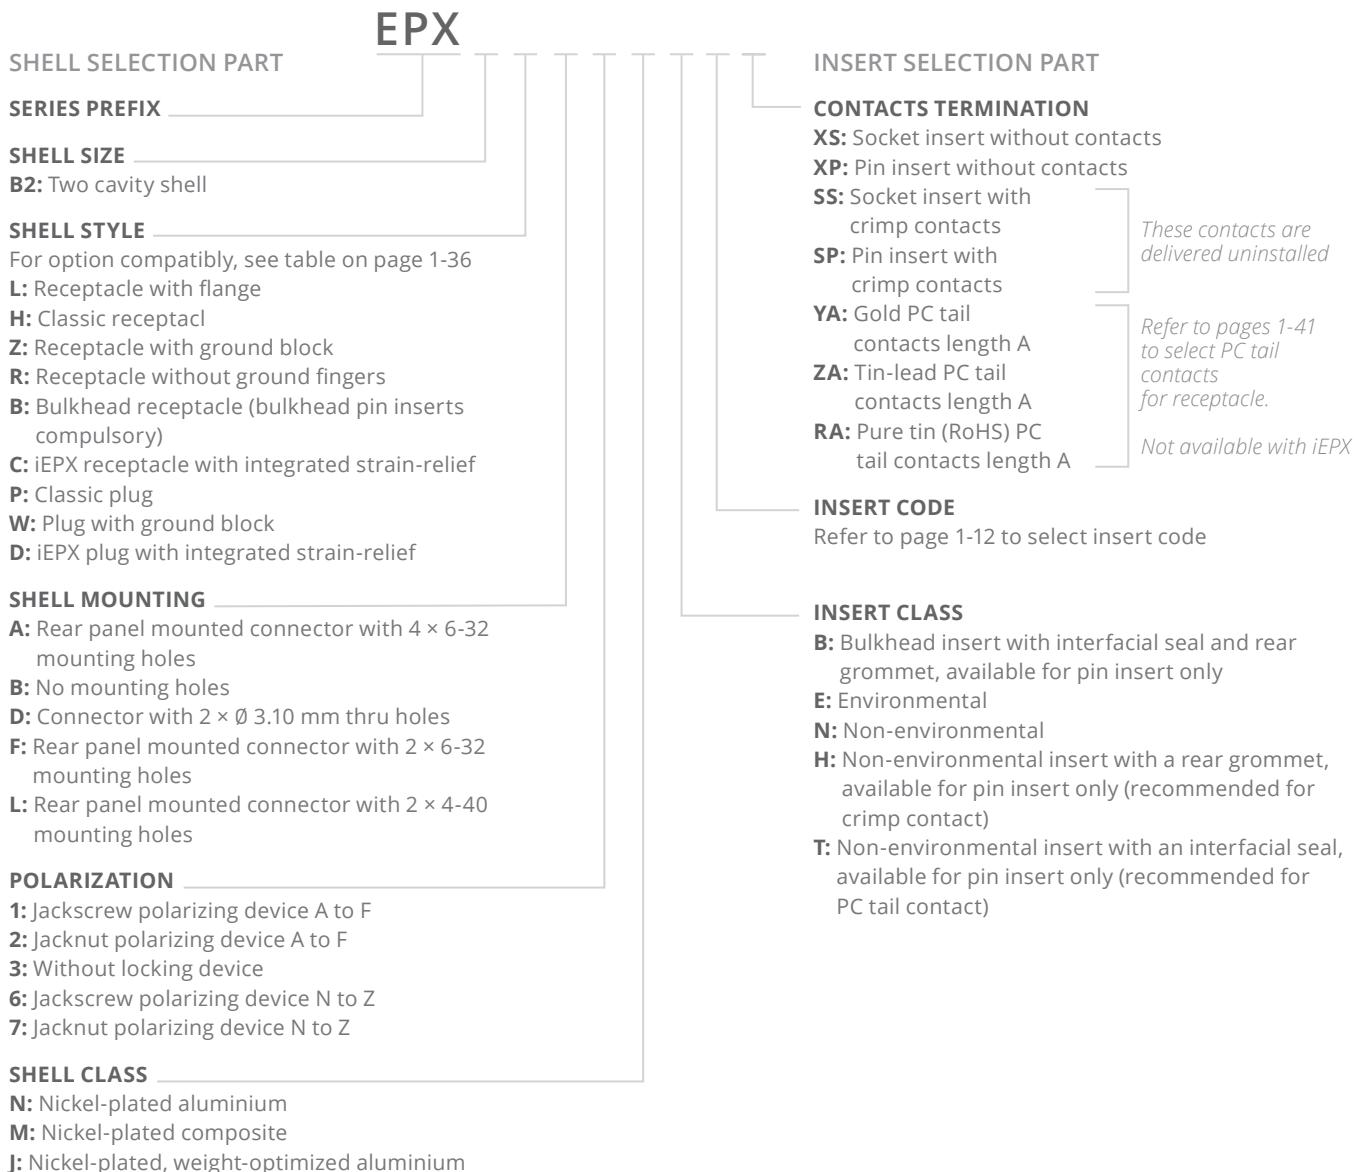

*Disconnect Application***HOW TO ORDER EPXB2 ASSEMBLY KIT**

Assembly kits are delivered fully assembled including shell with inserts mounted, with or without contacts, according to the selection. When selecting your insert codes, do not forget to place them in the order you want them assembled. Locking and polarizing devices are delivered uninstalled.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle.
- Crimp contacts can be delivered with a kit. Check which contacts will be included on page 1-10.
- PC tail contacts can also be delivered with a kit. Remember that only straight pin PC tail contacts are available, and in receptacle only.
- If PC tail contacts are selected, then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.

All connector inserts will use the same insert class and the same contact termination.

EPXB2 POLARIZATION CODE

As a standard, jackscrews are installed in plugs, and jacknuts are installed in receptacle shells; however, they both can be installed in either plugs and receptacles. The nut can be fixed with your automatic screwdriver and the tool bit we provide (P/N 282664).

Tip: use the shell reference mark (located at the top of the locking cavity) to choose keying position.

*Rack & Panel Application***HOW TO ORDER EPXB1, EPXB2, B3 & B4 ASSEMBLY KIT FOR LRM**

Assembly kit is delivered fully assembled including shell with inserts mounted, with or without contacts according to the selection. When selecting your insert codes, do not forget to place them in the order you want them assembled. Polarization hardware are always provided unassembled with assembly kits.

Tips to help you in your selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle.
- Crimp contacts can be delivered with a kit. Check which contacts will be included on page 1-12.
- If PC tail contacts are selected then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.
- If PC tail contacts are needed, remember that only straight pin PC tail contacts are available, and in plug only.

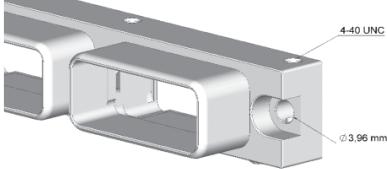

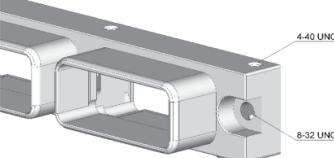

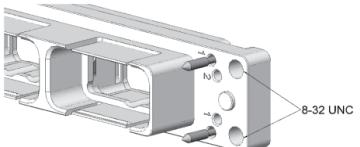

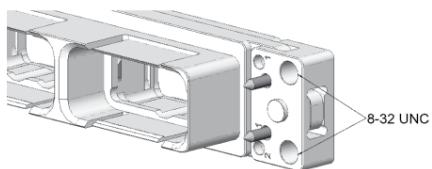

All connector inserts will use the same insert class and the same contact termination.

**Notes**

1. These contacts are delivered uninstalled.
2. Refer to pages 1-40 to select PC tail contacts for receptacle.

| Floating with 4 × 8-32 UNC panel rear mount  | T | N/A |

*Rack & Panel Application***EPXB POLARIZATION CODE**

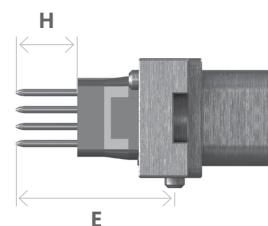

A polarization device is included in the part number and should be installed as shown below. Each shell has three polarization hardware, which can be in four different positions. Each polarization hardware can have its own position; this allows a large range of codification.

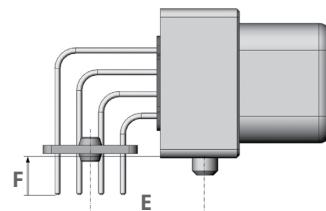

Connectors are shown front side with cavity A upwards.

*Rack & Panel Application***EPXB PANEL CUT-OUT CODING**

When several connectors are used with the same equipment, coding is available on the shell to correlate the correct shell with the correct panel cut-out.

On the panel cut-out, four areas are coded: area 1, 2, 3 and 4 (see figure below). For each area, one of the two holes should be drilled (hole n°1 or hole n°2). Each hole on the panel cut-out corresponds to the use of a coding pin on the shell.

*Rack & Panel Application***EPX GALLEY ARINC 810 PRODUCT OVERVIEW**

The new EPXB2 Galley connector was specially designed for the severe conditions required by galley equipment. A floating mechanism was developed to avoid any risk of jamming and to guarantee a fully sealed connection.

The EPXB2 is used on ovens, beverage makers, refrigerators, microwave ovens and other equipment that fits within the new standardized galley layouts.

The EPXB2 connector is modular and provides extra contact density to add new contacts such as the #8 Twinax CAN data bus contact. Backshell accessories are also available.

MULTI-GANG EPX® CONNECTORS

A whole range of multigang connectors are available for disconnect and Rack & Panel applications.

Multigang connectors features and benefits:

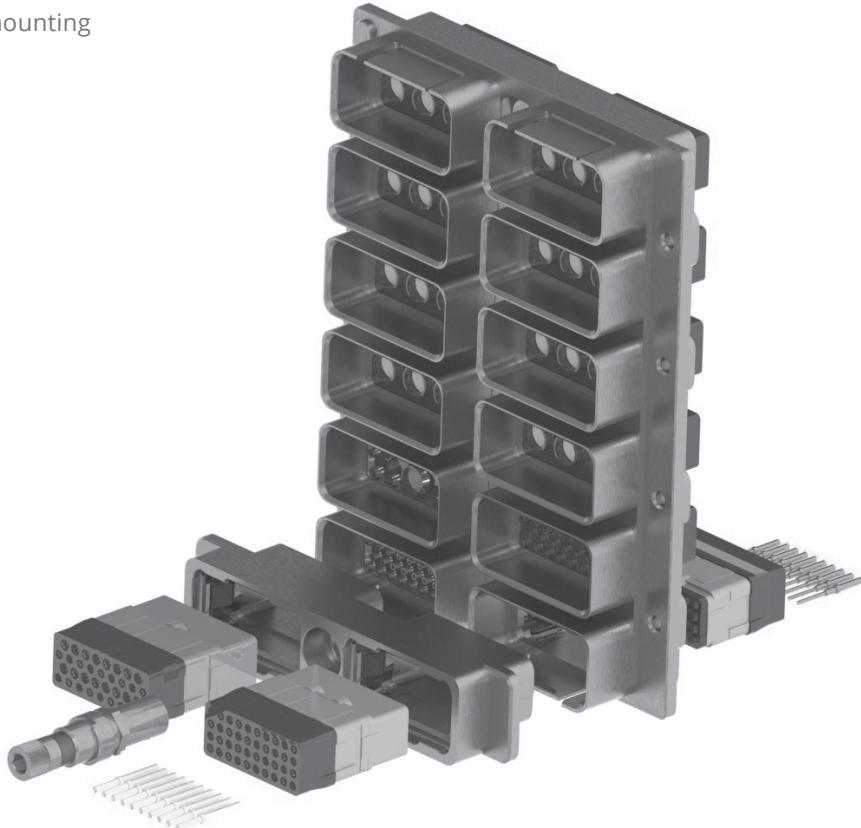

- Weight-saving design
- Make installation easier and quicker
- Utilize EPX modularity and its whole range of inserts
- Take advantage of EPX connector functionalities and use EPXB2 standard plug shells with a multigang shell

SPECIFICATIONS

- Several cavities for EPXB inserts (4 to 20 cavities)
- Standard EPX strain reliefs and backshells available
- In accordance with EN4644 performances

Several options are available:

- Grounding block
- Grounding spring fingers
- Float mounting
- Spring-loaded mounting
