**Subject:** *EU RoHS type 6 exemptions to end in 2021*

Dear customer,

In accordance with the European Directive 2011/65/EU on the restriction of using certain hazardous substances in electrical and electronic equipment, the type 6 exemptions related to the use of lead in alloys will end mid-2021.

As a manufacturer of interconnect components for the telecommunication, aerospace, defense, instrumentation, industrial and medical markets, RADIALL is working on two approaches to address this change:

- Collaborating with nearly a hundred other companies to prepare a renewal file of the exemptions
- Researching substitution materials internally and with external partners, such as CMG (Connector Manufacturers Group) and other research centers

For additional information, please contact Sylvie Lefloch Dubois at [sylvie.leflochdubois@radiall.com](mailto:sylvie.leflochdubois@radiall.com) or [infoenv@radiall.com](mailto:infoenv@radiall.com).

Best regards,

Sylvie LEFLOCH DUBOIS
