

FOR IMMEDIATE RELEASE

Arinc 600 Backshell: A Complimentary Connector Solution

September 2016 - Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has expanded its NSX Arinc 600 series with a new backshell offering. This new Arinc 600 backshell solution meets customer's needs and responds to today's aerospace market challenges for increasing data rates and growing performance requirements.

Radiall's comprehensive backshell offering provides reliable and easy to install solutions for EMI/RFI shielding and Strain Relief. From off-the-shelf solutions to custom designs, Radiall's complete range of Arinc 600 backshells is available for size 1, 2 and 3 connectors. By allowing multiple output options such as bandit or strain relief, we are able to meet a wide array of customer requirements.

Utilizing Radiall's expertise in rectangular connectors, this new backshell solution is designed to offer customers a reliable solution. Due to the FOD proof hardware and a unique adapter plate system, customers are guaranteed correct positioning of the Arinc 600 connector's insert. The exclusive design also provides improved EMI shielding which preserves the integrity and performance of the aircraft's electrical system.

The unique form factor of the NSX Arinc 600 backshell allows for simplified wiring, making it easy to install and facilitate maintenance, which ultimately saves time in workshops. To exceed customers' expectations, the NSX range features Arinc 600 plug connectors with adapter plates already mounted on the connector for even quicker installation.

For further information on Radiall's new NSX Arinc 600 backshell please contact a Radiall sales representative, Distributor or visit www.radiall.com

###

About Radiall

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
