

**FOR IMMEDIATE RELEASE**

## **USB Coaxial Switches: Designed for Test Environments**

October 2016 - Radiall, a global leader in design, development and manufacturing of innovative interconnect solutions, has developed new USB Coaxial Switches in order to simplify installation in test environments. These new switches utilize Radiall's patented RAMSES concept.

To support a market where technology quickly evolves and high speed data is required, our team of experts and engineers integrated a mini-USB terminal on SP6T & SP8T switches to meet customers' needs. The SPnT switch solution controlled by an USB interface complements our existing range of high performance, reliable coaxial switches. The innovative design makes it easy to integrate. Simply connect the switch to your computer and install the software.

Features & Benefits:

- SP6T & SP8T available with SMA & SMA2.9 connectors
- Up to 40 GHz
- 50 Ohms terminated or unterminated
- Delivered with supporting software, LabVIEW drivers & an installation guide on a USB key
- Only one cable (power supply and switch drive)
- Compatible with operating systems such as Windows
- Quick installation & easy use
- High performance and reliability

For further information on Radiall's expanded range of microwave coaxial switches, please contact a Radiall sales representative, Distributor or visit [www.radiall.com](http://www.radiall.com)

###

### **About Radiall**

Radiall is a global manufacturer of leading-edge interconnect solutions. The company offers an extensive range of RF coaxial connectors and cable assemblies, coaxial switches, fiber optic and microwave components, multipin connectors and more. Radiall has sales offices and subsidiaries throughout the world, R&D in the U.S., Europe and China, along with manufacturing facilities strategically located in the U.S., Mexico, India, and China.
