**SMPM/SMP/SMP-COM****INTRODUCTION**

	<b>SMP</b>	<b>SMP-COM</b>	<b>SMPM</b>
50Ω	DC - 40 GHz	DC - 12.4 GHz	DC - 65 GHz

**GENERAL**

- Small, lightweight connectors
- Snap-in, suitable for blindmate applications
- Excellent vibration and shock performances
- Allows axial and radial misalignment

**APPLICATIONS**

- Active array antenna
- Satellite
- Airborne / Ship / Ground radar
- Communication equipment
- High speed electro-optical devices
- Board-to-Board applications

**SMP SERIES**

Radiall SMP series meets MIL STD 348, figure 326 interface standard, and DESC specifications 94007 & 94008. They are intermateable with GPO® (Gilbert Engineering Inc.).

There are 3 levels of retention (applicable to the male connectors when ordering) which provide different levels of force required to connect and disconnect the connectors:

- Full detent for a positive locking with a maximum retention
- Limited detent for a positive locking with a medium retention
- Smooth bore for the lowest retention (slide connection)

Radiall also offers multiport solutions with SMP interface allowing better alignment control while mating multiple connectors. The multiport concept increases density and allows the operator to save installation time by connecting several SMP connectors in one operation.

**SMP-COM**

SMP-COM is an economically priced alternative fully intermateable with standard SMP connectors. It has been optimized to operate up to 12.4 GHz meeting the needs of telecom applications. Compared to SMP, which is primarily made of stainless steel material, SMP-COM uses brass material.

**SMPM**

30% smaller than SMP, SMPM connectors are designed for very high frequency applications where space and package density are a necessity.

The Radiall SMPM series meets MIL STD 348, figure 328 interface standard. They are intermateable with GPPO® (Gilbert Engineering Inc.).

There are 2 levels of retention (applicable to the male connectors when ordering):

- Full detent for a positive locking with a maximum retention
- Smooth bore for a lower retention but higher durability (mating cycles)

Unique visual identification groove: in order to easily identify full detent connectors versus smooth bore, Radiall SMPM full detent receptacles feature a groove on the outer body. This method of identification is an innovation by Radiall.

**SMPM SMT RECEPTACLE**

**SMPW**

## INTRODUCTION

### SUBMINIATURE RF CONNECTOR

Radiall has expanded its broad SMP range with SMPW.

A leader in micromachining, Radiall designed a new subminiature coaxial connector, SMPW, that provides higher performance up to 100 GHz.

Leveraging extensive knowledge in micromachining, high-performance design and measurement capabilities, Radiall is proud to introduce SMPW, a G3PO-compatible product.

In order to achieve higher reliability and stable performances with SMPW, Radiall perfected the design, manufacturability and measurement by utilizing controlled atmospheric rooms, dedicated to controlled micromachining and plating processes.

Radiall's SMPW is available in multiple configurations, including but not limited to cable connectors, edge mount, surface mount, bullet/adapters, multi-port and customized models.

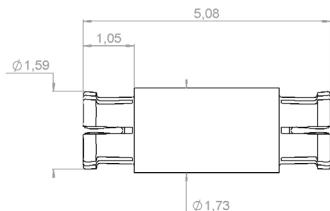

#### FEATURES & BENEFITS

- Micro miniature: Ø1.59
- Frequency DC-100 GHz
- Low VSWR: 1.02 up to 67 GHz
- Axial misalignment: 0.3 mm
- Radial misalignment: 2.2°

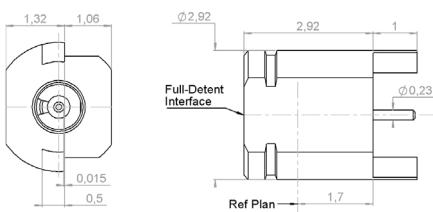

#### APPLICATIONS

- Electronic warfare
- Radar
- Dense wavelength division multiplexing (DWDM) module
- Array combiners
- Modulator links
- Microwave kinetic inductance detector (MKID)

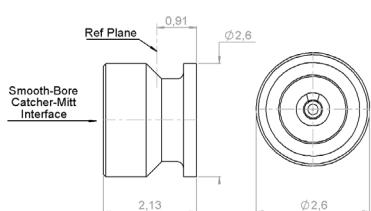

SMPW

SIMPLIFICATION IS OUR INNOVATION

**SMPM-LOCK™****INTRODUCTION**

Radiall has expanded its broad range of SMPM with SMPM-LOCK by Radiall™

This micro-miniature product features electrical performance up to 65 GHz. It is the smallest SMPM connector on the market with a locking system and space optimization, even in the tightest spaces, thanks to our right angle plug version.

SMPM-LOCK features a robust locking mechanism, which dramatically increases the retention force of the interface and prevents accidental disconnection.

**FEATURES & BENEFITS**

- High frequency: 65 GHz
- Reduces SMP-LOCK's size by 42%
- Temperature range: -65 °C to 165 °C
- IP6x sealing option
- EMI shielding option: up to 80 dB @ 40 GHz
- Vibration: MIL-STD-202G method 204, test condition D
- Shock: MIL-STD-202G method 213, test condition I
- Cable retention force:
  - Semi-rigid cable: .047 F > 45 N

1. CONNECT

2. LOCK

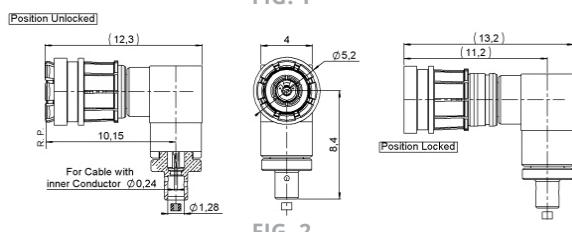

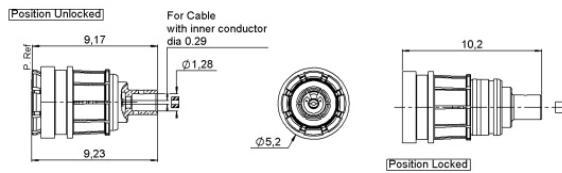

TWO-STEP CONNECTION

**SIMPLIFICATION IS OUR INNOVATION**

**SMP-LOCK™****INTRODUCTION****SMP-LOCK™: THE ULTIMATE SECURE CONNECTION**

Radiall has expanded its broad range of SMP products with SMP-LOCK™ connectors featuring a robust locking mechanism, which dramatically increases the retention force of the interface and prevents accidental disconnection.

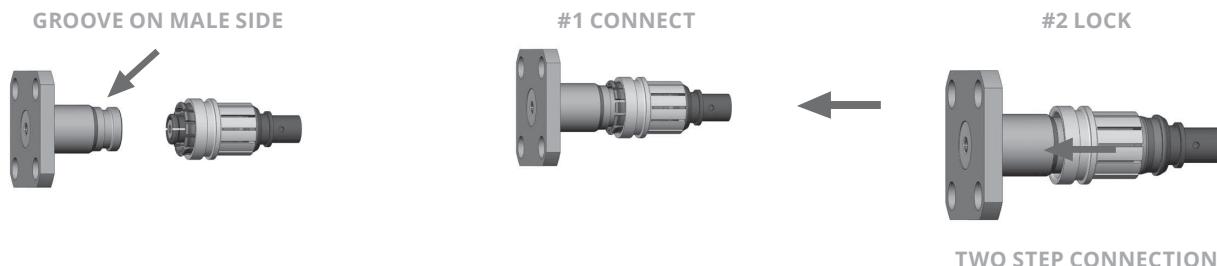

They have been specially designed for harsh environments and to withstand more severe vibration and drop tests.

SMP-LOCK™ connectors are suitable for cable-to cable or cable-to-module interconnections inside equipment subject to harsh mechanical stress such as airborne radars, avionics, satellites, missile, UAV and UGV applications.

**Features & benefits**

- Excellent electrical performance combined with robust locking feature
- Two step connection, low insertion force
- Audible click indicates that plug is locked, eliminating accidental disconnections
- Locking sleeve provides greater retention force more than 450 N with RG-405 cable
- SMP interface has a high frequency DC-40 GHz
- Plug equipped with EMI ring offers improved RF leakage performance -92dB at 18 GHz
- SMP-LOCK™ uses limited detent interface for lower connect/disconnect forces, less mechanical stress and a longer life cycle
- Extraction tool available for easy unmating in high density panels
- IP67 rating when mated

SMP-LOCK™
