SIMPLIFICATION IS OUR INNOVATION

SIMPLIFICATION is our INNOVATION

Radiall is a community of dedicated individuals with a shared purpose: simplify life for all those who innovate. Our manufacturing expertise allows us to deliver lighter and smaller products that simplify implementation and drive performance. We recognize that simplification starts with us, but proves its true benefits when it reaches you.

Introduction

Radiall is recognized in the Aerospace and Defense industries for offering one of the broadest innovative product portfolios for connector interconnect solutions. The benefit of our experience with ARINC connectors permits Radiall to provide customers with a strong and global solution.

The EPX[®] series offers a wide range of solutions based on two insert sizes with a large variety of shells and contacts. This product range provides an excellent trade-off between the number of available contacts and the space used. The EPX[®] series is completely modular and expandable.

EPX[®] connectors are standardized by the EN4644 European standard.

- A high density solution compared to circular connectors:
- Slim shell design with high contact density
- Stackable shells do not require additional space for locking and unlocking the connectors

EPXB:

5 shells #2 with 2*48 Cts

- --> Total Cts: 480
- --> Total surface: 96.90 * 91.80 = 8895.42 mm² Gives 18.53 mm²/contact

A **cost saving** and **user-friendly** solution:

- Inserts can be wired in the workshop and later installed in the shells
- A common panel cut-out simplifies the connector installation
- Inserts can be easily installed and removed from the shell
- Inserts and shells are keyed to prevent mis-mating
- Standard Mil spec tools for contact crimping and contact insertion/extraction
- Field replaceable sub-assemblies
- Vibration resistant self-locking threads

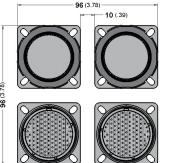

A **modular concept** with a large variety of options:

- Shell can accommodate a wide variety of inserts for signal, power, coax, data bus, fiber optic and high frequency BMA contacts
- Optional ground blocks (to meet the FAA HIRF requirements)
- Pin and socket inserts can be installed in either plug or receptacle shells (pin contacts are always fitted in the pin insert)

Radiall

EPX[®] a **versatile solution** available in two different versions:

- Aluminium
- Composite

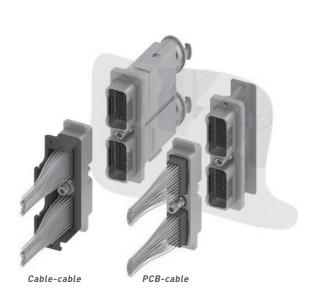

38999:

4 shells #23 with 100 Cts

- --> Total Cts: 400
- --> Total surface: 96.00 * 96.00 = 9216 mm² Gives 23.04 mm²/contact

Disconnect Applications

EPX[®] SERIE

Specially designed for panel integration on EWIS applications, EPX[®] disconnect connectors cover cable-to-cable and PCB-to-cable links in major commercial and business jet aircrafts.

The connector can be easily identified by the locking device located directly on the connector (quarter turn device for A1 and B1 and central screws for EPXB2). This disconnect solution offers secure mating while answering OEM's most stringent requirements, and provides:

- 1- Modularity with three shell sizes: EPXA1, EPXB1 and EPXB2 - available as lightweight shells and compatible with several options such as ground block functionality. EPX® connectors also feature a large variety of inserts and a unique range of contacts covering any technology. EPX® connectors answer all connecting needs with the use of a limited number of components.
- 2- Space savings with the combination of a slim shell design and high density inserts. In addition, EPX[®] disconnect stackable shells do not require additional space to lock and unlock the connectors.
- 3- Time savings and cost effectiveness with modular parts that enable pre-wiring. Connectors are easy to assemble as the receptacle can be pre-installed. Inserts will be wired in the shop and plugged later, which saves integration time.

EPXA1

EPXB1

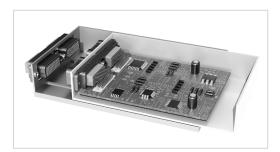

EPXB2

Rack and Panel Applications

In response to the need of system miniaturization and new equipment design, Radiall offers EPX[®] connector solutions for Line Replaceable Unit (LRU) and Line Replaceable Module (LRM). Discover more about these blind mate connectors:

EPXB2 for LRU

Largely used in distributed architecture, small Line Replaceable Units in an aircraft need compact, lightweight and cost effective connectors.

EPXB2 connectors equipped with centering guide will combine high density, low efforts and lightweight features. Discover the whole range of EPXB inserts offering from signal to power or quadrax contacts (available in straight or right angle PC tails and crimp contacts).

EPX Rack & Panel for LRM

Today, equipment manufacturers look for more cost effective and easy to maintain solutions such as Line Replaceable Module (LRM). As a result, Radiall has developed a new generation of Rack & Panel connectors. EPX[®] Rack & Panel connectors feature a modular, lightweight and high density shell that can be used on standalone PCB architecture.

EPX[®] rack and panel connectors are the perfect solution when equipment needs to combine compactness, weight savings and very high density. They offer:

- A modular range: from size 1 to size 4 using the complete range of EPX® inserts.
- Low mating force contacts from EPX[®] range that can reach very high density.
- A comprehensive range of contacts: right angle or straight PC tails for signal, coax, quadrax, or power contacts.

Disconnect Connector Technical Characteristics

ELECTRICAL CHARACTERISTICS EMI shielding effectiveness EN2591-213

| Frequency (MHz) | Leakage attenuation (dB) |
|-----------------|--------------------------|
| 100 | 65 |
| 200 & 300 | 63 |
| 400 | 62 |
| 500 & 600 | 60 |

- Shell to shell conductivity < 2.5 m Ω , operating voltage: 400 Vrms or 500 Vdc at sea level, according to EN2591-205
- Voltage stability (ground block): Maximum variation 4mV according to SAE AS 81714 (MIL-T-81714)

- Lightning strike:

- 5kA 1600V for EPX[®] connectors in aluminium version
- 3kA 1600V for EPX® connectors in composite version

MECHANICAL CHARACTERISTICS Mating/unmating

| Shell type | Material | Mating/Unmating |
|-----------------------|-----------|-----------------|
| EPXA1 / EPXB1 / EPXB2 | Aluminium | 100 cycles |
| EPXB1 / EPXB2 | Composite | 100 cycles |

Vibration & shock

| | | Vibration | Shock |
|--|-----------|---|--|
| Shell type | Material | For 8 hrs on each of the 3 axis/ interruption <1µs EN2591-403 EIA 364-28 | 3 shocks on each axis EN2591-402 EIA 364-27 |
| EPXA1 / EPXB1 | Aluminium | | Shock amplitude 50g /duration |
| EPXB1 / EPXB2 | Composite | Acceleration 27.8g | 11ms |
| EPXB2 | Aluminium | (test condition 6 letter G) | Shock amplitude 300g /duration 3ms |
| Disconnect EPX® with Quadrax contacts | / | Acceleration 16.9g (test condition 5 letter E) | Shock amplitude 50g /duration 11ms |

ENVIRONMENTAL CHARACTERISTICS

- **Temperature range:** according to EIA364-32 and EN2591-305
 - For EPXB2 aluminium, EPXB1 and EPXA1 shells: -65°C/+175°C (-85°F/+347°F)
 - For EPXB2 composite shell: -65°C/+125°C (-85°F/+257°F)
- Temperature life: 1000 hours at maximum temperature
- Salt spray: 96 hours (nickel-plated aluminium and composite) EN2591-307 EIA 364-26 test condition A
- Humidity: 10 days with temperature variation from -10°C to +65°C EIA 364-31 Method 4, test condition B
- Altitude immersion: EN2591-314 EIA 364-03:
 - EPXB insert: 3 cycles at 50,000 feet
 - EPXB Bulkhead class insert: 3 cycles at 55,000 feet
- **Air Leakage for EPXB2 Bulkhead receptacle:** Level from EN3645; test according EN2591-312 method B: 4.4x10⁻³ cm³/s (= 16x10⁻⁶ m³/h)

EPX® SERIES

Rack & Panel Connector Technical Characteristics

ELECTRICAL CHARACTERISTICS EMI shielding effectiveness EN2591-213

| Frequency (MHz) | Leakage attenuation (dB) |
|-----------------|--------------------------|
| 100 | 65 |
| 200 & 300 | 63 |
| 400 | 62 |
| 500 & 600 | 60 |

- Shell to shell conductivity: < 2.5 m $\Omega,$ operating voltage: 400 Vrms or 500 Vdc at sea level, according to EN2591-205
- Lightning strike: 5kA 1600V

MECHANICAL CHARACTERISTICS Mating/unmating

| Shell type | Material | Mating/Unmating |
|-------------------------------|-----------|-----------------|
| EPXB1 / EPXB2 / EPXB3 / EPXB4 | Aluminium | 500 cycles |

The minimum mating forces are described in the EN4644 standard and depend on the connector size and insert arrangement. Consult Radiall for more information.

Vibration & shock

| | | Vibration | Shock |
|-------------------------------|-----------|---|--|
| Shell type | Material | For 8 hrs on each of the 3 axis/ interruption <1µs EN2591-403 EIA 364-28 | 3 shocks on each axis EN2591-402 EIA 364-27 |

CONTACTS

EPX® series offers a wide range of contacts compliant with EN3155 and SAE AS 39029. The available contacts cover aerospace applications for terminating to both cables and printed circuit boards.

- Signal and power contacts
- High frequency with coax, twinax and triax contacts
- Ethernet links with Quadrax contacts
- Optical links with LuxCis® contacts

Discover our brand new range of signal & power contacts with selective gold plating.

Features and benefits:

- Significant reduction of cost of ownership
- Reduced dependence on gold rate fluctuation
- No change in the contact crimping or soldering process

Specifications:

- Same contact design as full plated version
- Contact interface gold plated with 1.27µm
- For crimp version, no changes are required for the crimping process
- For PC tail version, the use of selective plated contacts has no impact on PCB design
- Product qualification is available upon request

CONTACT SELECTION TABLE

NOTES:

(1) Electrical contacts for optical inserts are always pin contacts (hermaphrodite)

[2] In order to make these contacts environmental, it is necessary to add a sealing boot. Please contact us for additional information

(3) These power contacts can be used in power inserts only (25P1)

[4] These power contacts can be used in power inserts only (P3, 13P1 and 20P1)

LUXCIS® CONTACT PART NUMBERING SYSTEM

The sealing plug F718 211 200 is specifically designed to fill the unused LuxCis® Arinc 801 cavities.

NOTES:

 Mating cycles are dependant on connector series Radiall can support you with your cable and harness assemblies Please contact your sales representative

Signal PC tail Contacts

Selection table for straight PC tail contacts

Contact termination designations are a combination of 2 letters:

- The first letter characterizes the contact plating R = Pure-tin (RoHS); Z = Tin lead; Y = Gold
- The second letter characterizes the length of the PC tail: A to D

The exact lengths can be found on the assembly kit sections

M: Nickel-plated composite for EPXB1

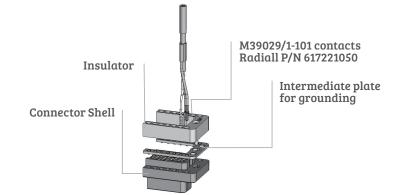

K: Nickel-plated aluminium for EPXB1 (mateable with version M composite shell)

N: Nickel-plated aluminium for EPXA1

GROUND BLOCK

Radiall provides a unique patented feature by integrating a ground block directly on the shell.

This option permits very short ground terminations

NOTES:

RACK & PANEL APPLICATION

Recommended locking torque: 1.6Nm (14.16 in-lbs) for metallic shell and 1.1Nm (9.73 in-lbs) max for composite shell
 Self-locking mounting holes are designed for rear panel mounting
 Please see page 1-28 on how to use the polarization device

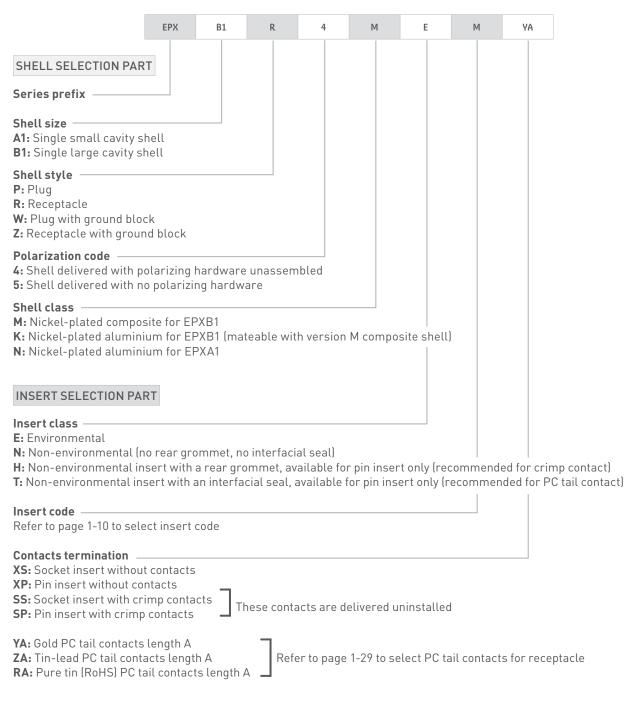

How to Order EPXA1 & EPXB1 Assembly Kit

Assembly kit is delivered fully assembled including shell with insert mounted, with or without contacts according to the selection.

Tips to help you make a selection:

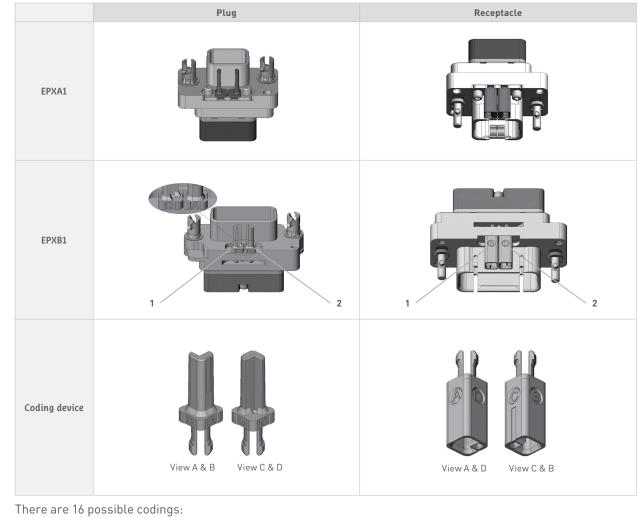

- You are free to use either pin or socket inserts in EPXA1 & EPXB1 plug or receptacles.
- Crimp contacts can be delivered with a kit, check which contacts would be included on page 1-10.
- If PC tail are selected then all cavities including signal, power and quadrax are populated. Size 5 coax cavities are not populated.
- If PC tail contacts are needed, remember that they are available as pin straight PC tail contacts in receptacles only.

Radiall

Polarization code for EPXA1 and B1

Caution: Read the polarization code from left to right, the same way the part number marking can be read on the connector.

EPXB2 Connectors

Radiall's EPXB2 disconnect connectors have been widely used in the aerospace industry for more than 10 years. Meant to be used in cable-to-cable and PCB-to-cable applications, EPXB2 connectors exceed civil aerospace market expectations in terms of high density, quick installation, and cost and weight savings.

Standardized by EN4644 European standard, Radiall's EPX® has been recognized as the leading rectangular modular connector and used in major commercial and business jet aircrafts. EPXB2 connectors are designed to cover any applications including:

reliability which are key characteristics of EWIS environments.

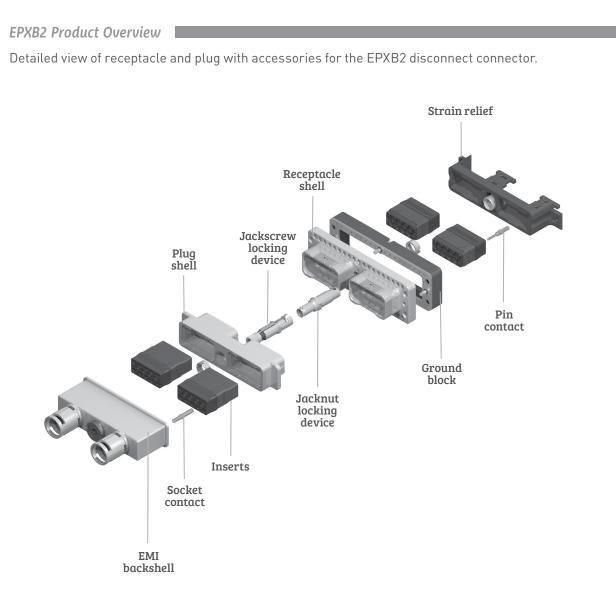

EPXB2 compactness, lightweight and robust design efficiently support avionics systems needs.

POWER DISTRIBUTION

of cabin systems.

EPXB2 stackable and segregated features make it the perfect solution for power distribution.

and intuitive installation for Fiber Optic and signal connections that are critical in cockpit design.

EPXB2 Range Overview

SHELL STYLES

δ

Classic EPXB2

Modular and flexible, EPXB2 answers all disconnect connecting needs with the use of a limited number of components. With a large variety of shells and one range of inserts, contacts and accessories, EPXB2 range is completely expandable and fits to your exact needs. You can mix and match solutions to build your connector with:

SHELL CLASSES - (ALL NICKEL PLATED)

EPXB2 Latest Innovations

iEPX

FEATURES AND BENEFITS:

- Quick and easy to terminate
- Lightweight
- Prevents FOD
- Cable-to-cable connection
- Integrated strain relief

MIX AND MATCH:

- Fully intermateable with all EPXB2 plugs and receptacles.

and weight.

- Modular and comprehensive range: iEPX uses all contacts and inserts from EPX® range

EPX® BULKHEAD

Radiall's EPXB2 Bulkhead receptacle is a perfect solution for disconnect panel sealing applications. Combining EPX[®] proven technology with Bulkhead functionality, EPXB2 Bulkhead modular connectors provide effective panel sealing with a user friendly and cost saving approach.

Radiall expands the EPX[®] series by offering iEPX, a new weight optimized EPXB2 shell designed to be used in disconnect panel applications. With an integrated strain relief and EMI backshell to press-in, iEPX provides EMI shielding while reducing cost

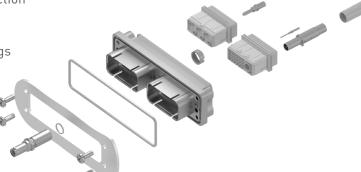

With EPXB Bulkhead pin insert range, Bulkhead receptacle provides permanent sealing between two zones with different environmental conditions.

FEATURES AND BENEFITS:

- Modular
- Competitive offer
- Optimized and mature design
- Easy and economical integration in the BOM
- PCB-to-cable or cable-to-cable connection

MIX AND MATCH:

- Fully intermateable with all EPXB2 plugs
- Uses EPX[®] broad range of accessories and contacts including signal, power, quadrax and fiber optics

NOTES:

RACK & PANEL APPLICATION

(1) Jackscrew/Jacknut can be mounted on either plug or receptacle shell. However, the standard options are:

- Jackscrew for plug shells

- Jacknut for receptacle shells (2) Please see page 1-40 for how to use the the polarization coding

How to Order EPXB2 Assembly Kit

Assembly kits are delivered fully assembled including shell with inserts mounted, with or without contacts according to the selection. When selecting your insert codes, do not forget to place them in the order you want them assembled. Locking and polarizing devices are delivered uninstalled.

Tips to help you make a selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle
- Crimp contacts can be delivered with a kit, check which contacts will be included on page 1-10
- PC tail contacts can also delivered with a kit. Remember that only straight pin PC tail contacts are available, and in receptacle only
- If PC tail contacts are selected then all cavities including signal, power and guadrax are populated. Size 5 coax cavities are not populated

All connector inserts will use the same insert class and the same contact termination. iEPX is not compatible with insert 3Q3 in environmental class.

EPXB2 Polarization Code

As a standard, jackscrews shall be installed in plugs and jacknuts in receptacle shells, however, jackscrew/jacknut can be installed in either plugs and receptacles. The nut can be fixed with your automatic screwdriver and the tool bit we provide (P/N 282664).

Tip: use the shell reference mark (located at the top of the locking cavity) to choose keying position.

How to Order EPXB1, EPXB2, B3 & B4 Assembly Kit for LRM

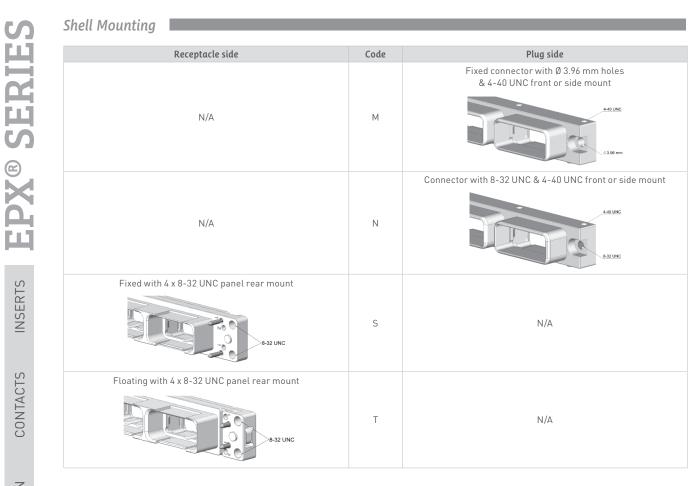

Assembly kit includes shell with inserts mounted, with or without contacts. When selecting your insert codes, do not forget to place them in the order you want them assembled. Polarization hardware are always provided unassembled with assembly kits.

Tips to help you make a selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle
- Crimp contacts can be delivered with a kit, check which contacts will be included on page 1-10
- If PC tail contacts are selected then all cavities including signal, power and quadrax are populated (Size 5 coax cavities are not populated)
- If PC tail contacts are needed, remember that they are only available in plugs All connector inserts will use the same insert class and the same contact termination.

EPXB Polarization Code

Polarization device is included in the part number and could be installed as shown below. Each shell has 3 polarization hardware which can be in four different position. The three polarization hardware can have their own position which allow a large range of codification.

Connectors are shown front side with cavity A upwards.

EPXB Panel Cut out Coding

When several connectors are used with the same equipment, a coding is available on the shell to correlate the correct shell with the correct panel cut-out.

On the panel cut out, four areas are coded, area 1, 2, 3 and 4 (see figure below). For each area, one of the two holes should be drilled (hole n°1 or hole n°2). Each hole on the panel cut out corresponds to the use of a coding pin on the shell.

NOTES:

(1) Pin/Socket centering guides can be mounted on either plug or receptacle shells. However, the standard options are:

- Pin centering guide for plug shells

- Socket centering guide for receptacle shells

How to Order EPXB2 Assembly Kit for LRU

Assembly kits includes shell with inserts mounted, with or without contacts. When selecting your insert codes, do not forget to place them in the order you want them assembled. Locking device is delivered uninstalled.

Tips to help you make a selection:

- You are free to use either pin or socket inserts in EPXB plug or receptacle
- Crimp contacts can be delivered with a kit, check which contacts will be included on page 1-10
- PC tail contacts can also delivered with a kit. Remember that only straight pin PC tail
- contacts are available, and in receptacle only. iEPX (styles C and D) are not available with PC tails If PC tail contacts are selected then all cavities including signal, power and
- quadrax are populated. Size 5 coax cavities are not populated

All connector inserts will use the same insert class and the same contact termination. EPX is not compatible with insert 3Q3 in environmental class.

EPX[®] Galley Arinc 810 Product Overview

The EPXB2 Galley connector was specially designed for the severe conditions required by galley equipment. A floating mechanism was developed to avoid any risk of jamming and to guarantee a fully sealed connection.

The EPXB2 is used on ovens, beverage makers, refrigerators, microwave ovens and other equipment which fit within the new standardized galley layouts.

The EPXB2 connector is modular and provides extra contact density to add new contacts such as the #8 Twinax CAN data bus contact. Backshell accessories are also available.

Detailed view of receptacle and plug with accessories for the EPXB2 galley connector.

How to Order EPX[®] Galley Equipment Connector

RECEPTACLE AND PLUG ASSEMBLY KIT

| Part number | Description |
|------------------------|------------------------------|
| 617610188 or 617610558 | Receptacle assembled kit (*) |
| 617610189 | Plug assembled kit (*) |

(*)Part numbers for assembly kits include: plug or receptacle shell, inserts, contacts, sealing plugs and dust caps.

Each item included in the kit is indicated in the table below and can also be ordered separately.

RECEPTACLE KITS

617610188

Shell with 2 self-locking threaded holes

| Part number | Description | Quantity per kit |
|-------------|----------------------------|---------------------|
| 617610212 | Receptacle shell | 1 |
| EPXBE25Q1PA | Insert for cavity A | 1 |
| EPXBE06PB | Insert for cavity B | 1 |
| 617200 | Pin crimp contacts/Size 22 | 15 |
| 617250 | Pin crimp contacts/Size 12 | 6 |
| 616910 | Filler plug | 9 |
| 617954003 | Dust cap | 2 |

| 617610558 | | |
|------------|--------|-------|
| Shell with | 2 thru | holes |

| Part number | Description | Quantity per kit |
|-------------|----------------------------|---------------------|
| 617610419 | Receptacle shell | 1 |
| EPXBE25Q1PA | Insert for cavity A | 1 |
| EPXBE06PB | Insert for cavity B | 1 |
| 617200 | Pin crimp contacts/Size 22 | 15 |
| 617250 | Pin crimp contacts/Size 12 | 6 |
| 616910 | Filler plug | 9 |
| 617954003 | Dust cap | 2 |

PLUG KIT 617610189 contents

| Part number | Description | Quantity per kit |
|-------------|-------------------------------|------------------|
| 617610213 | Plug shell | 1 |
| EPXBE25Q1SA | Insert for cavity A | 1 |
| EPXBE06SB | Insert for cavity B | 1 |
| 617300 | Socket crimp contacts/Size 22 | 15 |
| 617350 | Socket crimp contacts/Size 12 | 6 |
| 616910 | Filler plug | 9 |
| 617922007 | Strain relief | 1 |
| 617954002 | Dust cap | 2 |

CAN DATA BUS CONTACTS

| Part number | Description |
|-------------|---------------------------|
| 617165011 | Size 8 Twinax pin contact |
| 617065011 | Size 8 Twinax pin contact |

Multi-gang EPX[®] Connectors

A whole range of multigang connectors is available for disconnect and rack and panel applications. Multigang connectors features and benefits:

- Weight saving design
- Make installation easier and quicker
- Utilize EPX® modularity and its whole range of inserts
- Take advantage of EPX[®] connectors functionalities and use EPXB2 standard plug shells with a multigang shell

Radiall

Specifications

- Several cavities for EPXB inserts: from 4 to 20 cavities
- Standard EPX strain reliefs and backshells available
- In accordance with EN4644 performance

Several options are available:

- Grounding block
- Grounding spring fingers
- Float mounting
- Spring loaded mounting

SIMPLIFICATION is our INNOVATION

We advance the design and engineering process for innovators, ground-breakers and pioneers of technology. We reduce weight, improve durability, and streamline installation to provide leading-edge connectors that drive product performance.
