Introduction

A COMPLETE INTERCONNECT SOLUTION

Radiall is recognized in the aerospace and defense industries for offering one of the broadest innovative product portfolios for interconnect solutions. The benefit of Radiall’s experience with ARINC connectors and the high quality of the LuxCis® ARINC 801 contact enable Radiall to provide customers with strong and global solutions.

The combination of Radiall multipin connectors and LuxCis® ARINC 801 fiber optic contacts is the optimal solution for high and consistent performances in harsh environments.

MARKETS AND APPLICATIONS

Civil Aerospace
Airframe avionics, IFE (In-Flight Entertainment), HUD (Heads Up Display), power & flight management, pressurized and unpressurized area transmissions

Military Aerospace
Avionics, radar, weapons system, power & flight management

Data Transmissions
High speed data networking, including wavelength multiplexing, broadcast, radio signal

Radars
Remote antennas, phase array radar, military radio networking, satellite

Test Equipment
Modulator, repeater, transceivers, RF splitters and switches, measurement and test equipment in laboratories

Navy & Shipboard
Radar and missile system, communication

Geophysics
Oil & gas, mining, exploration with streamers arrays, roofers and shearing equipment

Sensors
Structural, environmental and airborne sensors
Introduction

RANGE OVERVIEW

Rectangular Connectors:

- EPX® EN4644

Circular Connectors:

- R8 MIL-DTL-38999 type
- R9 Hermetic MIL-DTL-38999 type
- LxC-R® single channel

Custom Design Connectors:

- Board to board and custom design

Harnesses and Optical System Capability

Refer to the multipin catalog for more information on Radiall's wide multipin connector range.
**EPX® EN4644 and QM Quick Multipin**

The EPX® EN4644 series offers a wide range of solutions based on two insert sizes with a large variety of shells, contacts and configurations. This product range provides an excellent trade-off between the number of available contacts and the space used. The EPX® series is completely modular and expandable.

**STANDARDS**
- RoHS compliant
- Compliant with EN4644 standard

**FEATURES AND BENEFITS**
- Designed and qualified for PC, UPC and APC (Angle Physical Contact) termination
- Optimized alignment of fiber optic contacts

**High Density Solution**
- Slim shell design with high contact density
- Higher density compared to circular MIL-spec connectors

**Cost Saving & Convenient Solution**
- Inserts can be easily installed and removed from the shell
- Inserts and shells are keyed to prevent mis-mating
- Standard MIL spec tools for contact crimping and contact insertion/extraction
- Vibration resistant self-locking threads
- Various options available to withstand harsh environments

**Modular Concept**
- Shell can accommodate a large variety of inserts for signal, power, coax, data bus, fiber optic and high frequency BMA contacts, providing various hybrid configurations
- EPX® inserts can also be used in the Radiall QM connectors
- Easy inspection, cleaning and manipulation of fiber optic contacts

**EPX® EN4644 SERIES FOR LUXCIS® ARINC 801 CONTACTS**

**STANDARDS**
- RoHS compliant
- Compliant with EN4644 standard

**FEATURES AND BENEFITS**
- Designed and qualified for PC, UPC and APC (Angle Physical Contact) termination
- Optimized alignment of fiber optic contacts

**High Density Solution**
- Slim shell design with high contact density
- Higher density compared to circular MIL-spec connectors

**Cost Saving & Convenient Solution**
- Inserts can be easily installed and removed from the shell
- Inserts and shells are keyed to prevent mis-mating
- Standard MIL spec tools for contact crimping and contact insertion/extraction
- Vibration resistant self-locking threads
- Various options available to withstand harsh environments

**Modular Concept**
- Shell can accommodate a large variety of inserts for signal, power, coax, data bus, fiber optic and high frequency BMA contacts, providing various hybrid configurations
- EPX® inserts can also be used in the Radiall QM connectors
- Easy inspection, cleaning and manipulation of fiber optic contacts

**EPXB:**
- 5 shells #2 with 2*12 LuxCis® ARINC 801 contacts
  - Number of contacts: 120
  - Total surface: 96.90 x 87.80 = 8507.82 mm²
  => Gives 70.90 mm²/contact

**MIL-DTL-38999:**
- 4 shells #23 with 24 LuxCis® ARINC 801 contacts
  - Number of contacts: 96
  - Total surface: 88.90 x 88.90 = 7903.21 mm²
  => Gives 82.32 mm²/contact

EPX® EN4644 and QM Quick Multipin

QM QUICK MULTIPIN SERIES FOR LUXCIS® ARINC 801 CONTACTS
A modular and tool less connector

Radiall QM connectors are designed for use with in-line disconnect applications on commercial airplanes. Radiall QM series offers outstanding performances and is designed with environmental and mechanical characteristics that provide long lasting durability needed for the most severe aerospace applications.

Two connector sizes are available in the QM series to optimize disconnect applications in terms of weight and density in an aircraft wiring system.

STANDARDS
- RoHS compliant

FEATURES AND BENEFITS
Using EPX® inserts, the QM series offers a wide array of arrangements that covers all contact technologies. It is manufactured under US patent App. No 11/614,642 and is available worldwide.

- Designed and qualified for APC (Angle Physical Contact) termination
- Optimized alignment of fiber optic contacts
- High conductive rails
- Save weight with composite connector
- Simplify the wiring design as no panel cut-out is needed
- Save time during wiring with a tool less connector

User friendly, no tool needed

Click to install
Push to lock

---

**EPXB connectors for rack & panel applications**

EPXB1  EPXB2  EPXB3  EPXB4
**EPX® EN4644 and QM Quick Multipin**

**ENVIRONMENTAL INSERTS**

![Environment Insert Diagram]

Notes: Inserts are designed for rear release and rear removable contacts. Pin and socket inserts can be pre-installed in either plug or receptacle shells.
- For EPX81, EPX83 and EPX84 shells, use only insert keyed A
- For EPX82 shells, use one insert keyed A and one insert keyed B
- For QM size A and B connector, use only insert keyed A

**HYBRID INSERTS**

Due to specifically designed inserts, EPX® EN4644 and QM connectors enable the combination of LuxCis® ARINC 801 contacts and electrical contacts in the same shell cavity.
## EPX® EN4644 and QM Quick Multipin

### HOW TO ORDER INSERTS

LuxCis® ARINC 801 in EPX® and QM connectors requires standard EPX® or QM shells and dedicated LuxCis® ARINC 801 inserts.

Available part numbers for inserts to be mounted inside QM size A connectors:

<table>
<thead>
<tr>
<th>Insert Arrangement</th>
<th>Insert Type</th>
<th>Part Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Insert F6: Full optic 6 LuxCis® ARINC 801 contacts</td>
<td>Pin Inserts</td>
<td>EPXA6F6PA</td>
</tr>
<tr>
<td></td>
<td>Socket Inserts</td>
<td>EPXA6F6SA</td>
</tr>
</tbody>
</table>

Available part numbers for inserts to be mounted inside EPXB or QM size B connectors:

<table>
<thead>
<tr>
<th>Insert Arrangement</th>
<th>Insert Type</th>
<th>Part Number for Keying A</th>
<th>Part Number for Keying B</th>
</tr>
</thead>
<tbody>
<tr>

<td>EPXB12F6PB</td>
</tr>
<tr>
<td></td>
<td>Socket insert</td>
<td>EPXB12F6SA</td>
<td>EPXB12F6SB</td>
</tr>
</tbody>
</table>

Notes: Socket inserts are always supplied with a sleeve holder. Pin inserts are not provided with sleeve holders. Pin and socket inserts can be pre-installed in plug or receptacle shells.

All fiber optic inserts are also described in the ARINC 801 or EN4639 documents. For more information on EPX® and QM connectors please refer to the latest version of the multipin catalog.
NSX ARINC 600 CONNECTORS FOR LUXCIS® ARINC 801 CONTACTS

Radiall's NSX ARINC 600 rack and panel connectors have been entrusted by the major aircraft manufacturers for many decades.

Used to connect high performance equipment in the aircraft's avionics bay, it features multiple LuxCis® ARINC 801 specific inserts, along with solutions to allow turning existing Quadrax cavities into LuxCis® ARINC 801 fiber optic cavities.

STANDARDS
- RoHS compliant
- Compliant with ARINC 600 standard

FEATURES AND BENEFITS
- Optimized alignment of fiber optic contacts
- High contact density
- Wide range of contact types and arrangements, including hybrid insert configurations
- Numerous shell polarization possibilities which give maximum security when mating the equipment in the rack
- Low mating forces
- EMI/RFI shielding option provided by shell to shell conductivity
- Convenient adapters that turn Quadrax cavities into LuxCis® ARINC 801 cavities to allow an easy evolution of electrical to optical

**NSX ARINC 600**

**INSERTS ARRANGEMENTS**

With more than 40 inserts available, 3 plating possibilities and a large number of accessories and options, Radiall’s NSX range offers the widest choice of ARINC 600 connector configurations on the market to answer all types of requirements. Available for sizes 1 to 3, it features Environmental and Non-Environmental versions for rear and front removable contacts.

Offering from size 1 to size 22 crimp or PC tailed contacts - including signal, coax, triax and Quadrax - the NSX range allows mixing of fiber optic and signal channels within the same connector.

The NSX product range includes specific inserts that can accommodate up to 36 LuxCis® ARINC 801 contacts per cavity. Quadrax inserts can also accommodate LuxCis® ARINC 801 fiber optic contacts with a specific adapter in order to address a wide array of distinct needs.

NSX ARINC 600

QUADRAX ADAPTERS FOR LUXCIS® ARINC 801Contacts
Adapters for NSX ARINC 600 connectors’ cavities allow evolution of existing connectors. Now, a high speed connection with a connector that used to be equipped with Quadrax contacts is available. Quadrax/LuxCis® adapters will turn a size 8 Quadrax cavity into a LuxCis® ARINC 801 cavity. This solution offers the following characteristics:
- Compliant with any ARINC 600 and Quadrax cavity
- Compatible with ML and MT LuxCis® ARINC 801 designs
- Compatible with Quadrax insertion and extraction tool
- Available for MultiMode applications

R8 Series: MIL-DTL-38999 Type

MIL-DTL-38999 TYPE CONNECTORS FOR LUXCIS® ARINC 801 CONTACTS

Radiall MIL-DTL-38999 for LuxCis® ARINC 801 fiber optic contact is a multi-channel connector that complies with the ARINC 801 specifications and 38999 Series III standards for the shells. This connector is available in various configurations, sizes and materials to deliver high performance in harsh environments.

Radiall MIL-DTL-38999 connector is a fiber optic solution for all defense and aerospace applications.

STANDARDS
- RoHS compliant (except for Aluminum olive drab cadmium finish)
- Compliant with ARINC 801 specifications
- Compliant with EN4645 standard

FEATURES AND BENEFITS
- Designed and qualified for PC, UPC and APC (Angled Physical Contact) termination
- Three stages of alignment:
  - Shell-to-shell keys
  - Alignment pins
  - Ceramic alignment sleeves
- Shell and locking mechanism compliant to MIL-DTL-38999 Series III standard:
  - Scoop-proof
  - Self-locking
  - Threaded coupling
- Rear grommet for direct sealing on the cable
- High contact density layouts available
- Wide range of accessories available to withstand harsh environments (backshells, protective caps, etc.)
- Hybrid versions
- Hermetic versions
- Easy inspection, cleaning and manipulation of fiber optic contacts with removable sleeve holders
- EMI shielding capability, with anodized aluminum

**R8 Series: MIL-DTL-38999 Type**

**HOW TO ORDER R8 CONNECTORS**

**R8**: LuxCis® MIL-DTL-38999 series

**Shell type:**
- W: Plug
- R: Square flange receptacle
- N: Jam nut receptacle

**Shell size:**

**Shell material and finish:**
- O: Aluminum olive drab cadmium (Salt spray: 500 h) - Non RoHS
- N: Nickel plated Aluminum (Salt spray: 48 h) - RoHS
- M: Nickel plated composite (Salt spray: 2000 h) - RoHS
- G: Nickel Aluminum bronze (Salt spray: 500 h) - RoHS

**Contact layout:**
- 2FO: 2 LuxCis® cavities (shell size 11)
- 2FO2E: 2 LuxCis® + 2 electrical cavities (shell size 13)
- 4FO: 4 LuxCis® cavities (shell size 13)
- 6FO: 6 LuxCis® cavities (shell size 15)
- 8FO: 8 LuxCis® cavities (shell size 17)
- 4FO4E: 4 LuxCis® + 4 electrical cavities (shell size 17)
- 12FO: 12 LuxCis® cavities (shell size 19)
- 8FO4E: 8 LuxCis® + 4 electrical cavities (shell size 19)
- 16FO: 16 LuxCis® cavities (shell size 21)
- 24FO: 24 LuxCis® cavities (shell size 23)
- 32FO: 32 LuxCis® cavities (shell size 25)

**Insert type:**
- S: Sealed insert for plug (R8W)
- P: Sealed insert for receptacle (R8R or RBN)

**Insert material:**
- A: Anodized Aluminum
- C: Non metalized composite

**Polarization:**
- N-A-B-C-D-E

All connectors are supplied with a plastic cap. All connectors are delivered without contacts. Plugs are delivered with sleeve holders. Accessories such as backshells or metalized caps must be ordered separately. Material and weight information are available upon request. Don’t hesitate to contact us for specific requirements such as custom configurations.

Radiall can support your cable assembly needs. Refer to Section 9 for our cable and harness assemblies.
**R9 Series: Hermetic MIL-DTL-38999 Type**

**HERMETIC MIL-DTL-38999 TYPE CONNECTORS FOR LUXCIS® ARINC 801 CONTACTS**

The LuxCis® ARINC 801 product range also includes an hermetic version of the proven 38999 multi-channel connector. Radiall’s R9 series provides high level of hermeticity and complies with ARINC specifications and 38999 series III dimensions.

**APPLICATIONS**

For harsh environment applications, the LuxCis® hermetic MIL-DTL-38999 type connectors are an optimal solution when secure and hermetic connection is required:
- Pressurized/unpressurized transitions
- Sensors in specific gas environments
- Pressurized box

**STANDARDS**

- Compliant with ARINC 801 specifications
- RoHS compliant

**FEATURES AND BENEFITS**

**HERMETICITY: 10-7 bar.cm³/s**

- Designed on MIL-DTL 38999 type connector parameters
- Sealed and robust connection
- Optimized alignment of fiber optic contacts
- Designed and qualified for PC, UPC and APC terminations
- Material: Nickel Plated Aluminum
- Resists to moisture ingress and operates at high altitudes, under extreme atmospheric pressure and in fast changing temperature conditions

**PRODUCT RANGE**

- Available in pigtail solution to mate with all MIL-DTL-38999 type connector sizes 11, 13, 15 and 21
- Various pigtail lengths available
- A bulkhead feed through adapter solution is also available
**R9 Series: Hermetic MIL-DTL-38999 Type**

**LxC-R® Series: Single Channel**

Miniature and robust, this unique single channel connector is ideally suited for applications requiring a single high-performance transmission in extreme environments such as in aerospace and military equipment. Specifically designed to be compatible with the industry standard LuxCis® ARINC 801 fiber optic contact, the LxC-R® is qualified to withstand high levels of vibrations and shocks.

The flexibility of the LuxCis® ARINC 801 contact allows the use of either MultiMode or SingleMode fibers for both PC and APC terminations. The LxC-R® product range includes plugs, square flange and jam nut receptacles, as well as hermetic configurations.

**STANDARDS**
- RoHS compliant

**FEATURES AND BENEFITS**

**High Performance**
- Optimized alignment of LuxCis® ARINC 801 fiber optic contacts
- Designed and qualified for PC, UPC and APC terminations
- Hermetic version available

**Direct Sealed Connection: IP67 Level**
- Interfacial gasket: shell to shell sealing
- Jam nut receptacle with O-ring for panel sealing
- Sealing boot: environmental grommet also guiding the fiber at the rear of the connector

**Easy to Install**
- Screwing locking mechanism
- Easy insertion/extraction of the LuxCis® ARINC 801 contact using M81969/14-03 standardized tool (Radiall PN 282 515)

**Robust Single Connection**
- Full pull-proof design with loose structure cable
- Anti-vibration coupling mechanism
- Two polarization keys available: 90° or 120°
- Small form factor

Custom Design Connectors

Radiall also designs LuxCis® ARINC 801 connectors to meet customers' footprints and space on the board, in the box or at the box interface.

Each connector integrates a number of LuxCis® ARINC 801 cavities and the locking mechanism depends on the application and the environment required by the customer.

Please contact your sales representative for a custom LuxCis® ARINC 801 connector.

Harnesses and Optical System Capability

OPTICAL SYSTEM CAPABILITY

Radiall’s design and manufacturing expertise, together with its wide interconnect product offerings, enable Radiall to meet customers’ needs for custom harness solutions. We can provide support for optical links requiring excellent performance and ease of installation, as well as develop application specific accessories or interconnect solutions when required. Radiall is able to support a wide range of requirements, from simple contact and connector solutions to the most complex fiber optic based harnesses or sub systems for harsh environments.

Refer to Section 9 for more information on Radiall’s optical systems, harnesses and cable assembly capabilities. For any additional information, please contact your local Radiall representative.
