

Acquisition of Van-System

Radiall acquires Italian company VAN-SYSTEM to expand its presence in the Industrial market

VAN-SYSTEM, a company founded in 1977 and located in Baranzate (Italy) within the suburbs of Milan, designs and manufactures circular electrical connectors for Industrial applications.

These interconnection solutions are compliant with the Mil-C-5015 standard and are suitable for markets such as railway (rolling stock and communication infrastructure), machine tools, automation, power supply, mining, oil & gas and entertainment industries. The company generated sales of € 8 million in 2014.

By combining Radiall's expertise in electrical signal, radio frequency, optic fiber and high speed data transmission with VAN-SYSTEM's knowledge of power connections in harsh environments, Radiall can increase its presence in the industrial market to fulfill its multi-market strategy.

For further information on the company, please contact jean-baptiste.bussone@radiall.com

About VAN-SYSTEM

VAN-SYSTEM develops and manufactures circular electrical connectors for Industrial applications dedicated to railway (rolling stock and communication infrastructure), machine tools, automation, power supply, mining, oil & gas and entertainment industries, etc. In addition to its connectors which comply with the Mil-C-5015 standard recognised for their high quality, VAN-SYSTEM develops and supplies products customized to particular applications or specifications.
